INGLÉS · NIVEL A1 · CUADERNO IMPRIMIBLE

Basic adverb order A1: frequency, manner, place and time

Classify the adverb first. Frequency, manner, place and time do not all use the same slot, so meaning must come before movement.

META DE LA LECCIÓN

Place common A1 adverbs and adverbial phrases without separating verbs from their objects.

MODELO

Nora is usually early. She speaks English clearly at work every day.

Al terminar podrás

1. Place frequency with be and lexical verbs
2. Place manner after the action or object
3. Order place before broad time
4. Avoid separating a verb from its object

La idea esencial

English adverbs occupy different zones according to meaning. Frequency normally appears before a lexical verb but after be; manner follows the action or object; place usually precedes broad time. The lesson turns these positions into a readable map.

Build the central contrast

The lesson is organised around a small set of choices that produce different meanings. Start from meaning, then locate the grammatical slot that carries that meaning. This keeps the sentence understandable and avoids a word-for-word transfer from Spanish.

Compare the complete examples rather than memorising an isolated word. The surrounding subject, verb, noun type and communicative purpose explain why the selected form is appropriate.

Context	Model	Control
Frequency + lexical	I usually walk to school.	Frequency precedes a lexical verb.
Frequency + be	Nora is usually early.	Frequency follows be.
Manner	She speaks English clearly.	Manner follows the object.

Read the sentence purpose

A statement, question, negative, offer or answer can activate a different form. Start from meaning, then locate the grammatical slot that carries that meaning. This keeps the sentence understandable and avoids a word-for-word transfer from Spanish.

Compare the complete examples rather than memorising an isolated word. The surrounding subject, verb, noun type and communicative purpose explain why the selected form is appropriate.

Context	Model	Control
Place-time	We study at home every evening.	Place normally precedes broad time.
Never	He never drinks coffee.	Never precedes a lexical verb.
Always + be	They are always ready.	Always follows be.

Control agreement and noun form

The selected structure must still agree with its subject or noun. Start from meaning, then locate the grammatical slot that carries that meaning. This keeps the sentence understandable and avoids a word-for-word transfer from Spanish.

Compare the complete examples rather than memorising an isolated word. The surrounding subject, verb, noun type and communicative purpose explain why the selected form is appropriate.

Context	Model	Control
Object integrity	She reads the message slowly.	Keep verb and object together.
Time fronting	On Mondays, we have English class.	A time frame can open the sentence.
Place	The children play in the park.	The place phrase follows the action.

Use the pattern in real interaction

Short exchanges reveal whether the structure sounds complete and purposeful. Start from meaning, then locate the grammatical slot that carries that meaning. This keeps the sentence understandable and avoids a word-for-word transfer from Spanish.

Compare the complete examples rather than memorising an isolated word. The surrounding subject, verb, noun type and communicative purpose explain why the selected form is appropriate.

Context	Model	Control
Manner adjective	He drives carefully.	Use the adverb carefully.
Multi-zone	She works quietly at home at night.	Manner, place, then time.
Frequency question	How often do you study? I study every day.	Every day answers frequency.

Compare nearby forms

Similar-looking alternatives are not interchangeable when polarity, logic or position changes. Start from meaning, then locate the grammatical slot that carries that meaning. This keeps the sentence understandable and avoids a word-for-word transfer from Spanish.

Compare the complete examples rather than memorising an isolated word. The surrounding subject, verb, noun type and communicative purpose explain why the selected form is appropriate.

Context	Model	Control
Frequency + be	Nora is usually early.	Frequency follows be.
Manner	She speaks English clearly.	Manner follows the object.
Place-time	We study at home every evening.	Place normally precedes broad time.

Repair the Spanish transfer

The English frame may encode the same idea with a different operator, determiner or word order. Start from meaning, then locate the grammatical slot that carries that meaning. This keeps the sentence understandable and avoids a word-for-word transfer from Spanish.

Compare the complete examples rather than memorising an isolated word. The surrounding subject, verb, noun type and communicative purpose explain why the selected form is appropriate.

Context	Model	Control
Never	He never drinks coffee.	Never precedes a lexical verb.
Always + be	They are always ready.	Always follows be.
Object integrity	She reads the message slowly.	Keep verb and object together.

Connect two decisions

A natural sentence often combines form, meaning and reference rather than testing one blank in isolation. Start from meaning, then locate the grammatical slot that carries that meaning. This keeps the sentence understandable and avoids a word-for-word transfer from Spanish.

Time fronting	On Mondays, we have English class.	A time frame can open the sentence.
Place	The children play in the park.	The place phrase follows the action.
Manner adjective	He drives carefully.	Use the adverb carefully.

Run the final audit

Before approving the sentence, reconstruct the intended meaning and check every visible dependency. Start from meaning, then locate the grammatical slot that carries that meaning. This keeps the sentence understandable and avoids a word-for-word transfer from Spanish.

From controlled form to real A1 communication

A learner controls Basic adverb order only when the form survives outside a single model sentence. Begin with the central contrast, rebuild it with a new subject and new vocabulary, and then place it inside a short exchange. The structure should remain accurate while the communicative details change.

Use a three-part review. First, name the intended meaning. Second, point to the word or position that carries that meaning. Third, read the whole sentence and check whether reference, agreement and register still fit the situation. This review turns a correct answer into a reusable A1 skill.

Do not judge the target form in isolation. Read the words immediately before and after it, identify the subject and the finite verb, and reconstruct the positive or neutral sentence when useful. This local context often explains an ending, an auxiliary, a determiner or a position that would otherwise seem arbitrary.

For independent study, complete one short stage at a time and record the reason for every correction. A useful note has three parts: the form you wrote, the form the sentence requires and the decision that separates them. Revisit that decision with a new example within twenty-four hours, then read both examples aloud and compare their rhythm with confidence.

Stage	Action	Success evidence
Recognise	identify the target decision	explains the meaning
Rebuild	change subject or vocabulary	keeps the pattern
Use	place it in a mini-dialogue	sounds complete
Review	correct and explain	names the controlling rule
