Comprensión auditiva - Módulo 1 - Elegir una respuesta

01 Elegir una respuesta 1

Excuse me, is room 110 on this floor?

02 Elegir una respuesta 2

We're going bowling after class tonight. Do you want to join us?

03 Elegir una respuesta 3

Do you know where I can find out about the campus tour times?

04 Elegir una respuesta 4

I forgot my calculator for the exam. Do you have one I could borrow?

05 Elegir una respuesta 5

Did you get your chemistry test results back yet?

06 Elegir una respuesta 6

How did your appointment with the adviser go?

07 Elegir una respuesta 7

I thought the package included a power cable.

08 Elegir una respuesta 8

Would you mind closing the door on your way out?

Comprensión auditiva - Módulo 1 - Audios extensos

09 Comprensión auditiva - Conversación

Student: Hi, I'm trying to find some articles for my history paper, but the database keeps saying I don't have access. Am I doing something wrong?

Librarian: Let me take a look. Which database are you using?

Student: It's called Historical Archives Online. When I click on the full article, it asks me to pay.

Librarian: Ah, I see the problem. You need to log in through the university portal first, not go to the database's website directly. When you access it through our library page, the university's subscription covers the cost, so you won't be asked to pay.

Student: Oh! I've just been searching on Google and clicking the first link. So I should always start from the library page?

Librarian: Exactly. Start from our "Databases" tab, log in with your student ID, and then search. Everything you find there will be free for you.

Student: That's such a relief. I was about to give up. One more thing - some of the articles are really old. Are they reliable for a history paper?

Librarian: For history, older primary sources can actually be very valuable. But check whether it's a primary source - an original document - or a secondary one analyzing it. Your professor probably wants a mix of both.

Student: Got it. Thank you so much, this helps a lot.

10 Comprensión auditiva - Anuncio

Good morning, everyone. This is an important announcement regarding the final exam schedule. Due to a scheduling conflict, the economics final exam originally set for Monday, December 15, has been moved to Wednesday, December 17, at the same time, nine a.m., and in the same room, Hall 3. Please update your calendars accordingly. If the new date creates a conflict with another exam, you must notify the examinations office by this Friday so that an alternative arrangement can be made.

No conflicts will be resolved after that deadline. A revised schedule has been posted on the department website and emailed to all enrolled students. If you did not receive the email, please check that your contact information is up to date in the student system. Thank you for your attention.

11 Comprensión auditiva - Charla académica

Professor: I want to talk today about a clever strategy that some animals use to survive: mimicry. Mimicry is when one species evolves to resemble another. And it turns out there are two very different kinds, which are easy to confuse. The first is called Batesian mimicry, named after the naturalist Henry Bates. Here, a harmless species evolves to look like a harmful or unpleasant one. Think of a harmless hoverfly that has the same black-and-yellow stripes as a stinging wasp. Predators that have learned to avoid wasps also avoid the hoverfly, even though it's completely defenseless. The mimic gets protection without having to invest in any actual defense - it's essentially bluffing. The second kind is Müllerian mimicry, named after Fritz Müller. In this case, two or more genuinely harmful species evolve to resemble each other. Several different species of stinging bees and wasps, for example, share similar warning colors. Why would harmful species imitate each other? Because it makes the shared warning signal more effective. A young predator only has to have one bad experience to learn to avoid that entire pattern, rather than learning separately for each species. So all the harmful species benefit by sharing a common "warning uniform." Here's the key contrast for your exam: in Batesian mimicry, the mimic is a liar - harmless but pretending to be dangerous. In Müllerian mimicry, everyone is telling the truth - they're all genuinely dangerous, and they cooperate by looking alike.

Both strategies exploit the same thing: a predator's ability to learn and remember warning signals. Evolution, in a sense, is manipulating the predator's memory.

Comprensión auditiva - Módulo 2 - Elegir una respuesta

12 Elegir una respuesta 1

Why is the library so crowded this evening?

13 Elegir una respuesta 2

Could you proofread this paragraph before lunch?

14 Elegir una respuesta 3

Where can I pick up my new identification card?

15 Elegir una respuesta 4

I may have deleted the wrong spreadsheet.

16 Elegir una respuesta 5

When does the campus shuttle stop running?

17 Elegir una respuesta 6

Did Marcus agree to lead the discussion?

18 Elegir una respuesta 7

This soup tastes much spicier than yesterday’s.

19 Elegir una respuesta 8

Should I bring my laptop to the workshop?

Comprensión auditiva - Módulo 2 - Audios extensos

20 Restablecimiento del acceso a una base de datos de investigación

Student: I can open the library catalog, but the research database says my access has expired.

Librarian: Your student record is active. Are you connecting from off campus?

Student: Yes, and I used an old bookmark.

Librarian: That explains it. The database changed its address last month. Begin at the library website and sign in through the new link. Older articles are still available there; only the address changed. I will email the troubleshooting page in case your browser saved the previous login.

21 Recogida de entradas del teatro

Announcer: Tickets reserved for Friday's student theater performance can be collected at the arts center box office beginning today. The box office is open from noon until six. Bring the confirmation message, either printed or on your phone. Uncollected reservations will be released at four p.m. on Friday, two hours before the performance. Seats are assigned, so arriving early will not change your location.

22 Cómo los manglares modelan las costas

Professor: Mangroves are groups of trees and shrubs adapted to the intertidal zones of many tropical and subtropical coasts. These environments challenge ordinary land plants. Salt levels vary, tides cover the soil, and waterlogged mud contains little oxygen. Different mangrove species have different adaptations, including structures that exclude or remove salt and roots that obtain support or exchange gases near the surface. The visible roots also change the physical coast. They slow moving water and trap suspended sediment. As sediment accumulates, it can help stabilize the shoreline. During waves and storms, mangrove vegetation can reduce some wave energy, although no forest can prevent every loss under every condition. The protection depends on factors such as forest width, structure, storm strength, and local geography. Mangrove habitats support fish, crabs, birds, and other organisms, and many young fish use the complex root area as shelter. Mangrove soils can also store large amounts of carbon because waterlogged conditions slow decomposition. When a forest is cleared or its soil is disturbed, some stored carbon may return to the atmosphere. Thus mangroves connect biology, coastal processes, and climate, but their services should be described with evidence and local conditions rather than as universal guarantees.

Expresión oral - Escuchar y repetir

23 Repetición 1

The meeting is on Friday.

24 Repetición 2

He forgot his keys, so he waited outside.

25 Repetición 3

The company launched a new product earlier this month.

26 Repetición 4

The students who volunteered at the shelter received a certificate of appreciation.

27 Repetición 5

Although the storm caused some delays, all the passengers eventually reached their destinations safely.

28 Repetición 6

The student newspaper is looking for volunteers to photograph events and interview members of campus organizations.

29 Repetición 7

Before submitting the research proposal, each team should review the instructions carefully and confirm that every required section is included.

Expresión oral - Entrevista

30 Entrevista 1

To start, tell me about a person you admire. Who are they, and why do you admire them?

31 Entrevista 2

Some people prefer to cook at home, while others prefer to eat at restaurants. Which do you prefer, and why? Give reasons and an example.

32 Entrevista 3

Your school can invest in either more sports facilities or more science laboratories. Which would you recommend, and why? Explain how it would benefit students.

33 Entrevista 4

Finally, make a prediction: how do you think shopping will change over the next twenty years? Explain your reasoning.
