Comprensión auditiva - Módulo 1 - Elegir una respuesta

01 Elegir una respuesta 1

Excuse me, do you know where the biology lab is?

02 Elegir una respuesta 2

Could you take a look at my essay before I hand it in?

03 Elegir una respuesta 3

Do you know where I can renew my parking permit?

04 Elegir una respuesta 4

I'm really sorry, but I don't think I can make it to our meeting tomorrow.

05 Elegir una respuesta 5

So did you hear back about that job you interviewed for?

06 Elegir una respuesta 6

Did the maintenance team repair the lights?

07 Elegir una respuesta 7

Could you tell me where the nearest pharmacy is?

08 Elegir una respuesta 8

I am not sure this table will fit through the doorway.

Comprensión auditiva - Módulo 1 - Audios extensos

09 Comprensión auditiva - Conversación

Student: Hi, thanks for seeing me. I'm a second-year biology major, but lately I've been wondering if I should switch to environmental science.

Advisor: That's a big decision. What's drawing you toward environmental science?

Student: Honestly, I love my biology classes, but I keep feeling like I want to work on real-world problems - climate, conservation, that kind of thing. Environmental science seems more focused on that.

Advisor: That's a good instinct to explore. Before you switch, though, let me point something out. A lot of the biology courses you've already taken would count toward an environmental science degree - ecology, chemistry, statistics. So switching now probably wouldn't set you back much.

Student: Oh, that's reassuring. I was worried I'd lose a whole year.

Advisor: You likely wouldn't. But here's my advice: before you make it official, take one environmental science elective next semester. That way you can test whether the actual coursework matches what you're imagining. Sometimes a field sounds perfect until you're in the classroom.

Student: That makes a lot of sense. I'd rather try one course than commit blindly.

Advisor: Exactly. Take the elective, see how it feels, and come back and talk to me at the end of the semester. Then we'll decide together.

10 Comprensión auditiva - Anuncio

Good evening, residents. This is a brief announcement from the residence hall management. Starting this weekend, we will be upgrading the internet system throughout the building to provide faster and more reliable service. As part of this work, the internet may be temporarily unavailable on Saturday between eight a.m. and noon. We recommend planning any important online work - such as submitting assignments or attending online classes - around this window.

If you have a deadline on Saturday morning, please consider using the computer lab in the library, which will not be affected. Once the upgrade is complete, you should notice a significant improvement in connection speed, especially in the evenings when usage is highest. We appreciate

your patience during this short interruption. Thank you.

11 Comprensión auditiva - Charla académica

Professor: Today I want to introduce an idea from economics that has a surprisingly wide reach: the concept of opportunity cost. It sounds technical, but it captures something we all experience every day. Opportunity cost is simply the value of the next-best thing you give up when you make a choice.

Here'S The Key Insight: every choice has a cost, even when no money changes hands. Suppose you have a free Saturday afternoon. You could study, sleep, see friends, or work a shift for extra money. If you choose to study, the opportunity cost isn't zero just because studying is free - the cost is whatever you valued most among the things you gave up. Maybe that's the income from the shift you didn't work, or the relaxation you sacrificed. Economists argue that the true cost of anything is what you forgo to get it. Why does this matter? Because people often ignore opportunity costs and focus only on out-of-pocket expenses. Imagine a business owner who owns her shop building and thinks she has no rent to pay. An economist would point out that she does have a cost: she could be renting that building to someone else. By using it herself, she gives up that rental income. That forgone income is a real opportunity cost, even though no bill arrives in the mail. The concept also explains why "free" is rarely truly free. A free two-hour seminar still costs you two hours you could have spent otherwise. So the next time you evaluate a decision, don't just ask what it costs in dollars. Ask what you're giving up.

Thinking in terms of opportunity cost tends to lead to better decisions, because it forces you to compare your choice against the best available alternative, not against nothing.

Comprensión auditiva - Módulo 2 - Elegir una respuesta

12 Elegir una respuesta 1

When are the revised schedules being posted?

13 Elegir una respuesta 2

I wonder why the laboratory is unusually warm.

14 Elegir una respuesta 3

Would you like me to carry one of those boxes?

15 Elegir una respuesta 4

Where can I download the workshop materials?

16 Elegir una respuesta 5

I thought the museum was open on Mondays.

17 Elegir una respuesta 6

Why did the committee reject the first proposal?

18 Elegir una respuesta 7

Could we take a short break before the next section?

19 Elegir una respuesta 8

How was the traffic on your way here?

20 Exploración de la carrera de ciencias ambientales

Student: I am considering environmental science, but I have enjoyed both biology and public policy. I am not sure which side of the major matters more.

Adviser: The program intentionally combines them. You study natural systems and also how communities make environmental decisions.

Student: I have not taken calculus yet. Is that a problem?

Adviser: Not for the introductory course. Enroll in Environmental Systems first, and take the required mathematics course alongside it. The department’s open house next Tuesday will let you meet students working in several specializations.

21 Horario temporal del comedor

Announcer: The Lakeside Dining Hall will open one hour late, at eight a.m., on Thursday while the kitchen water system is inspected. The Riverside Café will begin serving breakfast at seven and will accept all campus meal plans. Lakeside will resume its normal schedule on Friday. Thursday’s lunch and dinner hours are not affected, and no other dining locations will change their schedules.

22 Interpretación del radar meteorológico Doppler

Professor: Weather radar sends energy pulses and detects what atmospheric targets scatter back. Reflectivity displays that returned energy. Stronger returns often indicate more or larger precipitation particles, helping meteorologists locate precipitation and estimate intensity. But insects, birds, buildings, and other non-weather targets also produce returns. A bright color is not automatically heavy rain. Doppler radar adds information from changes in the frequency of the returned signal. From that change, a radar estimates radial velocity-the component of motion directly toward or away from the instrument. It does not measure the complete motion of the air in every direction. Near a rotating storm, adjacent regions moving toward and away from the radar can form an important velocity pattern, but meteorologists must consider the radar’s viewing angle and other evidence. Distance and Earth’s curvature also matter. The beam rises relative to the ground as it travels farther, so distant observations may sample a storm well above the surface. Terrain can block the beam, and intense precipitation can weaken signals from features behind it. Forecasters therefore examine multiple scans, nearby radars, satellite images, surface observations, and reports. Radar is powerful because it updates rapidly and reveals structure, not because one image answers every question.

Expresión oral - Escuchar y repetir

23 Repetición 1

The park is near my house.

24 Repetición 2

She turned off the computer and went to bed.

25 Repetición 3

The volunteers cleaned the beach every Saturday morning.

26 Repetición 4

The article explained how ocean currents affect the climate of coastal regions.

27 Repetición 5

Even though the project was challenging, the team completed it ahead of the original schedule.

28 Repetición 6

A technician will visit each classroom tomorrow to inspect the projectors and replace damaged cables.

29 Repetición 7

To reduce delays at the registration desk, students should complete the online form and bring a printed confirmation to their appointment.

Expresión oral - Entrevista

30 Entrevista 1

To begin, describe a skill you would like to learn. What is it, and why do you want to learn it?

31 Entrevista 2

Some people prefer to work in a team, while others prefer to work alone. Which do you prefer, and why? Give reasons and an example.

32 Entrevista 3

Your university has money to improve either the library or the cafeteria. Which would you recommend, and why? Explain how it would benefit students.

33 Entrevista 4

Finally, make a prediction: how might cities change over the next twenty years to become more environmentally friendly? Explain your reasoning.
