ENGLISH B2 · ADVANCED GRAMMAR

Dependent prepositions

Use the prepositions selected by particular verbs, adjectives and nouns and recognise when the following form must be a gerund. The lesson connects form, meaning, register and real editorial decisions rather than treating the pattern as an isolated rule.

THE CENTRAL IDEA

Use dependent prepositions to build accurate lexical-grammatical patterns rather than translating prepositions directly while preserving the intended meaning and register.

Use the prepositions selected by particular verbs, adjectives and nouns and recognise when the following form must be a gerund.

MODEL

The team succeeded in reducing response times.

verb/adjective/noun + fixed preposition + noun or -ing

6 GUIDED STAGES · 30 LEARNING DECISIONS

This complete guide combines explanation, visual reasoning, practice and feedback. Separate exercise and answer-key editions are also available from the lesson page.

LEARNING OUTCOMES

Outcome 1 Recognise the main dependent prepositions patterns in authentic contexts.	Outcome 2 Choose a form that accurately expresses build accurate lexical-grammatical patterns rather than translating prepositions directly.
Outcome 3 Avoid errors that change time, agency, emphasis or speaker commitment.	Outcome 4 Use the structure appropriately in professional writing, discussion, applications and everyday communication.

Build meaning before form

Use the prepositions selected by particular verbs, adjectives and nouns and recognise when the following form must be a gerund.

What dependent prepositions communicates

Use the prepositions selected by particular verbs, adjectives and nouns and recognise when the following form must be a gerund.

The central purpose is to build accurate lexical-grammatical patterns rather than translating prepositions directly. A successful choice therefore preserves the proposition while making the intended relationship, viewpoint or degree of commitment visible to the reader.

The team succeeded in reducing response times.	a verb whose complement requires a fixed preposition
She is responsible for coordinating the regional offices.	an adjective linked to its complement by a fixed preposition
There has been a sharp increase in remote applications.	a noun that selects a specific prepositional complement

How the pattern is built

Use this working formula: verb/adjective/noun + fixed preposition + noun or -ing. The formula is a decision path: it identifies the trigger, the clause architecture and the element that carries tense or modality.

The model “The team succeeded in reducing response times.” shows the complete pattern in context. Rebuild the sentence from meaning to form instead of translating each word independently.

Choice	Structure	Example
Verb pattern	verb + preposition + noun/-ing	The team succeeded in reducing response times.
Adjective pattern	adjective + preposition + noun/-ing	She is responsible for coordinating the regional offices.
Noun pattern	noun + preposition + noun/-ing	There has been a sharp increase in remote applications.

Choose by meaning, not by surface similarity

Neighbouring structures may contain similar words but perform different jobs. Compare the three reference patterns and name the intended effect before completing the sentence.

A reliable answer explains both why the chosen form works and why a plausible alternative would change the meaning, time relation, information focus or level of certainty.

Meaning	Best route
a verb whose complement requires a fixed preposition	Verb pattern
an adjective linked to its complement by a fixed preposition	Adjective pattern
a noun that selects a specific prepositional complement	Noun pattern

Register, discourse and editorial control

This grammar is especially useful in professional writing, discussion, applications and everyday communication. Its value comes from helping the reader process a relationship efficiently, not from making the sentence sound artificially complex.

After editing, check recoverability, natural word order and consistency with the surrounding paragraph. If the marked structure creates ambiguity, return to a fuller or more neutral clause.

02 · VISUAL MAP

Reason through the pattern

The visual map moves from communicative purpose to structural trigger, then to the final clause. It keeps meaning and form visible at the same time so the learner can justify every choice.

DECIDE IN THIS ORDER

STEP 1

Decision 1

Identify the communicative purpose before selecting a form: build accurate lexical-grammatical patterns rather than translating prepositions directly.

STEP 2

Decision 2

Locate the structural trigger and match it to one of the reference patterns.

STEP 3

Decision 3

Check time reference, clause relationships, agency and speaker commitment.

STEP 4

Decision 4

Read the complete sentence in context and confirm that its register suits professional writing, discussion, applications and everyday communication.

STEP 5

Decision 5

Compare the result with a neutral alternative and keep the marked form only when it adds useful meaning.

Compare forms and meanings

Use the table to justify each structural choice.

Pattern	Form	Model
Verb pattern	verb + preposition + noun/-ing	The team succeeded in reducing response times.
Adjective pattern	adjective + preposition + noun/-ing	She is responsible for coordinating the regional offices.
Noun pattern	noun + preposition + noun/-ing	There has been a sharp increase in remote applications.

STAGE CHECK

Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

Recognition in context

Compare the form first, then read the explanation and name the rule in your own words.

A1

The team succeeded in reducing response times.

Verb pattern is the best match because a verb whose complement requires a fixed preposition.

A2

She is responsible for coordinating the regional offices.

Adjective pattern is the best match because an adjective linked to its complement by a fixed preposition.

A3

There has been a sharp increase in remote applications.

Noun pattern is the best match because a noun that selects a specific prepositional complement.

A4

a verb whose complement requires a fixed preposition

The Verb pattern pattern communicates a verb whose complement requires a fixed preposition.

A5

an adjective linked to its complement by a fixed preposition

The Adjective pattern pattern communicates an adjective linked to its complement by a fixed preposition.

A6

a noun that selects a specific prepositional complement

The Noun pattern pattern communicates a noun that selects a specific prepositional complement.

Form and function

Compare the form first, then read the explanation and name the rule in your own words.

B1

Verb pattern / a verb whose complement requires a fixed preposition

The structure belongs to the Verb pattern pattern. Its communicative purpose is a verb whose complement requires a fixed preposition.

B2

Adjective pattern / an adjective linked to its complement by a fixed preposition

The structure belongs to the Adjective pattern pattern. Its communicative purpose is an adjective linked to its complement by a fixed preposition.

B3

Noun pattern / a noun that selects a specific prepositional complement

The structure belongs to the Noun pattern pattern. Its communicative purpose is a noun that selects a specific prepositional complement.

Guided discourse choices

Compare the form first, then read the explanation and name the rule in your own words.

C1

The team succeeded in reducing response times.

Verb pattern: verb + preposition + noun/-ing.

C2

She is responsible for coordinating the regional offices.

Adjective pattern: adjective + preposition + noun/-ing.

C3

There has been a sharp increase in remote applications.

Noun pattern: noun + preposition + noun/-ing.

C4

The team succeeded in reducing response times.

Verb pattern: verb + preposition + noun/-ing.

C5

She is responsible for coordinating the regional offices.

Adjective pattern: adjective + preposition + noun/-ing.

C6

There has been a sharp increase in remote applications.

Noun pattern: noun + preposition + noun/-ing.

Open reconstruction

Compare the form first, then read the explanation and name the rule in your own words.

D1

succeeded in reducing

Verb pattern requires “succeeded in reducing” in this model. verb + preposition + noun/-ing.

D2

responsible for coordinating

Adjective pattern requires “responsible for coordinating” in this model. adjective + preposition + noun/-ing.

D3

increase in

Noun pattern requires “increase in” in this model. noun + preposition + noun/-ing.

D4

verb + preposition + noun/-ing

Verb pattern is built as verb + preposition + noun/-ing.

D5

adjective + preposition + noun/-ing

Adjective pattern is built as adjective + preposition + noun/-ing.

Controlled transformation

Compare the form first, then read the explanation and name the rule in your own words.

E1

The team succeeded in reducing response times.

verb + preposition + noun/-ing. The rewrite preserves the core message while adding the intended verb pattern effect.

E2

She is responsible for coordinating the regional offices.

adjective + preposition + noun/-ing. The rewrite preserves the core message while adding the intended adjective pattern effect.

E3

There has been a sharp increase in remote applications.

noun + preposition + noun/-ing. The rewrite preserves the core message while adding the intended noun pattern effect.

E4

The team succeeded in reducing response times.

verb + preposition + noun/-ing. The rewrite preserves the core message while adding the intended verb pattern effect.

Communicative production

Compare the form first, then read the explanation and name the rule in your own words.

F1

The team succeeded in reducing response times. The surrounding context would then state the same situation in neutral order or with a less marked commitment.

A strong response uses verb + preposition + noun/-ing accurately and makes the communicative purpose visible in context.

F2

She is responsible for coordinating the regional offices. The surrounding context would then state the same situation in neutral order or with a less marked commitment.

A strong response uses adjective + preposition + noun/-ing accurately and makes the communicative purpose visible in context.

F3

There has been a sharp increase in remote applications. The surrounding context would then state the same situation in neutral order or with a less marked commitment.

A strong response uses noun + preposition + noun/-ing accurately and makes the communicative purpose visible in context.
