ENGLISH B2 · ADVANCED GRAMMAR

# Third conditional

Build unreal past conditions and their imagined past results with precise past perfect and modal perfect forms. The lesson connects form, meaning, register and real editorial decisions rather than treating the pattern as an isolated rule.

THE CENTRAL IDEA

Use third conditional to evaluate how a different past cause could have produced a different past result while preserving the intended meaning and register.

Build unreal past conditions and their imagined past results with precise past perfect and modal perfect forms.

MODEL

If we had checked the data, we would have found the error.

if + past perfect | would / could / might + have + past participle

6 GUIDED STAGES · 30 LEARNING DECISIONS

This complete guide combines explanation, visual reasoning, practice and feedback. Separate exercise and answer-key editions are also available from the lesson page.

LEARNING OUTCOMES

| | |
|---|---|
| Outcome 1<br>Recognise the main third conditional patterns in authentic contexts. | Outcome 2<br>Choose a form that accurately expresses evaluate how a different past cause could have produced a different past result. |
| Outcome 3<br>Avoid errors that change time, agency, emphasis or speaker commitment. | Outcome 4<br>Use the structure appropriately in reflection, explanation, criticism and counterfactual argument. |

# Build meaning before form

Build unreal past conditions and their imagined past results with precise past perfect and modal perfect forms.

# What third conditional communicates

Build unreal past conditions and their imagined past results with precise past perfect and modal perfect forms.

The central purpose is to evaluate how a different past cause could have produced a different past result. A successful choice therefore preserves the proposition while making the intended relationship, viewpoint or degree of commitment visible to the reader.

| If we had checked the data, we would have found the error. | an imagined result of a past action that did not happen |
|---|---|
| If Maya had applied, she could have won the grant. | a past opportunity that was possible but unrealised |
| If the team had waited, the market might have recovered. | an uncertain alternative past result |

# How the pattern is built

Use this working formula: if + past perfect | would / could / might + have + past participle. The formula is a decision path: it identifies the trigger, the clause architecture and the element that carries tense or modality.

The model “If we had checked the data, we would have found the error.” shows the complete pattern in context. Rebuild the sentence from meaning to form instead of translating each word independently.

| Choice | Structure | Example |
|---|---|---|
| Unreal result | if + had + participle, would have + participle | If we had checked the data, we would have found the error. |
| Past possibility | if + had + participle, could have + participle | If Maya had applied, she could have won the grant. |
| Uncertain result | if + had + participle, might have + participle | If the team had waited, the market might have recovered. |

# Choose by meaning, not by surface similarity

Neighbouring structures may contain similar words but perform different jobs. Compare the three reference patterns and name the intended effect before completing the sentence.

A reliable answer explains both why the chosen form works and why a plausible alternative would change the meaning, time relation, information focus or level of certainty.

| Meaning | Best route |
|---|---|
| an imagined result of a past action that did not happen | Unreal result |
| a past opportunity that was possible but unrealised | Past possibility |
| an uncertain alternative past result | Uncertain result |

# Register, discourse and editorial control

This grammar is especially useful in reflection, explanation, criticism and counterfactual argument. Its value comes from helping the reader process a relationship efficiently, not from making the sentence sound artificially complex.

After editing, check recoverability, natural word order and consistency with the surrounding paragraph. If the marked structure creates ambiguity, return to a fuller or more neutral clause.

# Reason through the pattern

The visual map moves from communicative purpose to structural trigger, then to the final clause. It keeps meaning and form visible at the same time so the learner can justify every choice.

| 01 | 02 | 03 | 04 | 05 |
|---|---|---|---|---|
| if | past perfect | would / could / might | have | past participle |

## DECIDE IN THIS ORDER

STEP 1

### Decision 1

Identify the communicative purpose before selecting a form: evaluate how a different past cause could have produced a different past result.

STEP 2

### Decision 2

Locate the structural trigger and match it to one of the reference patterns.

STEP 3

### Decision 3

Check time reference, clause relationships, agency and speaker commitment.

STEP 4

### Decision 4

Read the complete sentence in context and confirm that its register suits reflection, explanation, criticism and counterfactual argument.

STEP 5

### Decision 5

Compare the result with a neutral alternative and keep the marked form only when it adds useful meaning.

# Compare forms and meanings

Use the table to justify each structural choice.

| Pattern | Form | Model |
|---|---|---|
| Unreal result | if + had + participle, would have + participle | If we had checked the data, we would have found the error. |
| Past possibility | if + had + participle, could have + participle | If Maya had applied, she could have won the grant. |
| Uncertain result | if + had + participle, might have + participle | If the team had waited, the market might have recovered. |

## EXAMPLES AT A GLANCE

| | |
|---|---|
| If we had checked the data, we would have found the error. | an imagined result of a past action that did not happen |
| If Maya had applied, she could have won the grant. | a past opportunity that was possible but unrealised |
| If the team had waited, the market might have recovered. | an uncertain alternative past result |

## COMMON ERRORS

EDIT THIS

### Avoid this pattern

Do not place would have inside the ordinary if-clause.

EDIT THIS

### Avoid this pattern

Do not use could had; a modal is followed by have plus a participle.

EDIT THIS

### Avoid this pattern

Do not present might have as a certain result.

# Recognition in context

Choose the sentence whose grammar matches the stated communicative purpose.

A1 · MEANING DECISION 1

Which sentence best communicates this purpose: an imagined result of a past action that did not happen?

OPTIONS If we had checked the data, we would have found the error. · If Maya had applied, she could have won the grant. · If the team had waited, the market might have recovered.

A2 · MEANING DECISION 2

Which sentence best communicates this purpose: a past opportunity that was possible but unrealised?

OPTIONS If Maya had applied, she could have won the grant. · If the team had waited, the market might have recovered. · If we had checked the data, we would have found the error.

A3 · MEANING DECISION 3

Which sentence best communicates this purpose: an uncertain alternative past result?

OPTIONS If the team had waited, the market might have recovered. · If we had checked the data, we would have found the error. · If Maya had applied, she could have won the grant.

A4 · INTERPRETATION 4

What does “If we had checked the data, we would have found the error.” communicate in this context?

OPTIONS an imagined result of a past action that did not happen · a past opportunity that was possible but unrealised · an uncertain alternative past result

A5 · INTERPRETATION 5

What does “If Maya had applied, she could have won the grant.” communicate in this context?

OPTIONS a past opportunity that was possible but unrealised · an uncertain alternative past result · an imagined result of a past action that did not happen

A6 · INTERPRETATION 6

What does “If the team had waited, the market might have recovered.” communicate in this context?

OPTIONS an uncertain alternative past result · an imagined result of a past action that did not happen · a past opportunity that was possible but unrealised

STAGE CHECK

## Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

# Form and function

Identify both the structural family and the meaning carried by each model.

B1 · FORM AND FUNCTION 1

"If we had checked the data, we would have found the error." uses _____ to express _____.

OPTIONS Gap 1: Unreal result / Past possibility / Uncertain result · Gap 2: an imagined result of a past action that did not happen / a past opportunity that was possible but unrealised / an uncertain alternative past result

B2 · FORM AND FUNCTION 2

"If Maya had applied, she could have won the grant." uses _____ to express _____.

OPTIONS Gap 1: Past possibility / Uncertain result / Unreal result · Gap 2: a past opportunity that was possible but unrealised / an uncertain alternative past result / an imagined result of a past action that did not happen

B3 · FORM AND FUNCTION 3

"If the team had waited, the market might have recovered." uses _____ to express _____.

OPTIONS Gap 1: Uncertain result / Unreal result / Past possibility · Gap 2: an uncertain alternative past result / an imagined result of a past action that did not happen / a past opportunity that was possible but unrealised

STAGE CHECK

## Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

# Guided discourse choices

Maintain accurate form and meaning across a connected sequence of decisions.

C1 · EDITORIAL PLANNING

Choose the model that expresses an imagined result of a past action that did not happen: _____. Choose the model that expresses a past opportunity that was possible but unrealised: _____. Choose the model that expresses an uncertain alternative past result: _____. Choose the model built with if + had + participle, would have + participle: _____. Choose the model built with if + had + participle, could have + participle: _____. Choose the model built with if + had + participle, might have + participle: _____.

_____
_____

WORD BANK

## Available forms

If Maya had applied, she could have won the grant. · If the team had waited, the market might have recovered. · If we had checked the data, we would have found the error.

STAGE CHECK

## Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

# Open reconstruction

Recover the missing structural trigger without a word bank.

D1 · INDEPENDENT RECONSTRUCTION

If we _____ the data, we would have found the error. If Maya had applied, she _____ the grant. If the team had waited, the market _____. State the full structural pattern for Unreal result: _____. State the full structural pattern for Past possibility: _____.

_____
_____
_____
_____

STAGE CHECK

## Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

# Controlled transformation

Rewrite the neutral source so that it performs the requested advanced function.

E1 · TRANSFORMATION 1

Rewrite “We did not check the data, so we did not find the error.” using the Unreal result pattern to express an imagined result of a past action that did not happen.

_____
_____

E2 · TRANSFORMATION 2

Rewrite “Maya did not apply, although winning was possible.” using the Past possibility pattern to express a past opportunity that was possible but unrealised.

_____
_____

E3 · TRANSFORMATION 3

Rewrite “The team did not wait; recovery was possible but not certain.” using the Uncertain result pattern to express an uncertain alternative past result.

_____
_____

E4 · TRANSFORMATION 4

Rewrite “We did not check the data, so we did not find the error.” using the Unreal result pattern to express an imagined result of a past action that did not happen.

_____
_____

STAGE CHECK

### Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

# Communicative production

Use the grammar independently in realistic academic, professional and conversational contexts.

F1 · PRODUCTION TASK 1

Write two connected sentences about a realistic situation. Use Unreal result to express an imagined result of a past action that did not happen, then add a neutral sentence that makes the contrast clear.

_____
_____
_____

F2 · PRODUCTION TASK 2

Write two connected sentences about a realistic situation. Use Past possibility to express a past opportunity that was possible but unrealised, then add a neutral sentence that makes the contrast clear.

_____
_____
_____

F3 · PRODUCTION TASK 3

Write two connected sentences about a realistic situation. Use Uncertain result to express an uncertain alternative past result, then add a neutral sentence that makes the contrast clear.

_____
_____
_____

# Final self-check

Complete these prompts without reopening the guide.

R1 · REVIEW FOCUS

Explain and exemplify: communicative purpose.

_____
_____

R2 · REVIEW FOCUS

Explain and exemplify: structural trigger.

_____
_____

R3 · REVIEW FOCUS

Explain and exemplify: meaning contrast.

_____
_____

R4 · REVIEW FOCUS

Explain and exemplify: register choice.

_____
_____

R5 · REVIEW FOCUS

Apply this decision to a new example, then justify it: Identify the communicative purpose before selecting a form: evaluate how a different past cause could have produced a different past result..

_____
_____

R6 · REVIEW FOCUS

Apply this decision to a new example, then justify it: Locate the structural trigger and match it to one of the reference patterns..

_____
_____

STAGE CHECK

### Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

# Recognition in context

Compare the form first, then read the explanation and name the rule in your own words.

A1

If we had checked the data, we would have found the error.

Unreal result is the best match because an imagined result of a past action that did not happen.

A2

If Maya had applied, she could have won the grant.

Past possibility is the best match because a past opportunity that was possible but unrealised.

A3

If the team had waited, the market might have recovered.

Uncertain result is the best match because an uncertain alternative past result.

A4

an imagined result of a past action that did not happen

The Unreal result pattern communicates an imagined result of a past action that did not happen.

A5

a past opportunity that was possible but unrealised

The Past possibility pattern communicates a past opportunity that was possible but unrealised.

A6

an uncertain alternative past result

The Uncertain result pattern communicates an uncertain alternative past result.

# Form and function

Compare the form first, then read the explanation and name the rule in your own words.

B1

### Unreal result / an imagined result of a past action that did not happen

The structure belongs to the Unreal result pattern. Its communicative purpose is an imagined result of a past action that did not happen.

B2

### Past possibility / a past opportunity that was possible but unrealised

The structure belongs to the Past possibility pattern. Its communicative purpose is a past opportunity that was possible but unrealised.

B3

### Uncertain result / an uncertain alternative past result

The structure belongs to the Uncertain result pattern. Its communicative purpose is an uncertain alternative past result.

# Guided discourse choices

Compare the form first, then read the explanation and name the rule in your own words.

C1

If we had checked the data, we would have found the error.

Unreal result: if + had + participle, would have + participle.

C2

If Maya had applied, she could have won the grant.

Past possibility: if + had + participle, could have + participle.

C3

If the team had waited, the market might have recovered.

Uncertain result: if + had + participle, might have + participle.

C4

If we had checked the data, we would have found the error.

Unreal result: if + had + participle, would have + participle.

C5

If Maya had applied, she could have won the grant.

Past possibility: if + had + participle, could have + participle.

C6

If the team had waited, the market might have recovered.

Uncertain result: if + had + participle, might have + participle.

# Open reconstruction

Compare the form first, then read the explanation and name the rule in your own words.

D1

had checked

Unreal result requires “had checked” in this model. if + had + participle, would have + participle.

D2

could have won

Past possibility requires “could have won” in this model. if + had + participle, could have + participle.

D3

might have recovered

Uncertain result requires “might have recovered” in this model. if + had + participle, might have + participle.

D4

if + had + participle, would have + participle

Unreal result is built as if + had + participle, would have + participle.

D5

if + had + participle, could have + participle

Past possibility is built as if + had + participle, could have + participle.

# Controlled transformation

Compare the form first, then read the explanation and name the rule in your own words.

E1

If we had checked the data, we would have found the error.

if + had + participle, would have + participle. The rewrite preserves the core message while adding the intended unreal result effect.

E2

If Maya had applied, she could have won the grant.

if + had + participle, could have + participle. The rewrite preserves the core message while adding the intended past possibility effect.

E3

If the team had waited, the market might have recovered.

if + had + participle, might have + participle. The rewrite preserves the core message while adding the intended uncertain result effect.

E4

If we had checked the data, we would have found the error.

if + had + participle, would have + participle. The rewrite preserves the core message while adding the intended unreal result effect.

# Communicative production

Compare the form first, then read the explanation and name the rule in your own words.

F1

If we had checked the data, we would have found the error. The surrounding context would then state the same situation in neutral order or with a less marked commitment.

A strong response uses if + had + participle, would have + participle accurately and makes the communicative purpose visible in context.

F2

If Maya had applied, she could have won the grant. The surrounding context would then state the same situation in neutral order or with a less marked commitment.

A strong response uses if + had + participle, could have + participle accurately and makes the communicative purpose visible in context.

F3

If the team had waited, the market might have recovered. The surrounding context would then state the same situation in neutral order or with a less marked commitment.

A strong response uses if + had + participle, might have + participle accurately and makes the communicative purpose visible in context.

07 · FEEDBACK

# Diagnose the pattern, not only the score

Use this page to decide what to revisit in the complete guide.

CHECK · TRIGGER OR CONTEXT

What went wrong? What rule will prevent the same error next time?
