ENGLISH C1 · ADVANCED GRAMMAR

Advanced question forms

Use negative questions, rhetorical questions, echo questions and embedded questions to manage assumptions and interaction. The lesson connects form, meaning, register and real editorial decisions rather than treating the pattern as an isolated rule.

THE CENTRAL IDEA

Use advanced question forms to ask while signalling surprise, expectation, challenge or interpersonal distance while preserving the intended meaning and register.

Use negative questions, rhetorical questions, echo questions and embedded questions to manage assumptions and interaction.

MODEL

Would it not be safer to delay the launch?

negative auxiliary + subject | statement + question focus | embedded wh + statement order

6 GUIDED STAGES · 30 LEARNING DECISIONS

This complete guide combines explanation, visual reasoning, practice and feedback. Separate exercise and answer-key editions are also available from the lesson page.

LEARNING OUTCOMES

Outcome 1 Recognise the main advanced question forms patterns in authentic contexts.	Outcome 2 Choose a form that accurately expresses ask while signalling surprise, expectation, challenge or interpersonal distance.
Outcome 3 Avoid errors that change time, agency, emphasis or speaker commitment.	Outcome 4 Use the structure appropriately in conversation, interviews, debate and professional clarification.

Build meaning before form

Use negative questions, rhetorical questions, echo questions and embedded questions to manage assumptions and interaction.

What advanced question forms communicates

Use negative questions, rhetorical questions, echo questions and embedded questions to manage assumptions and interaction.

The central purpose is to ask while signalling surprise, expectation, challenge or interpersonal distance. A successful choice therefore preserves the proposition while making the intended relationship, viewpoint or degree of commitment visible to the reader.

Would it not be safer to delay the launch?	an expected answer or persuasive assumption presented as a question
They approved which version?	surprise or a request to confirm one part of prior information
Could you explain why the figures do not match?	a question embedded inside a polite or analytical frame

How the pattern is built

Use this working formula: negative auxiliary + subject | statement + question focus | embedded wh + statement order. The formula is a decision path: it identifies the trigger, the clause architecture and the element that carries tense or modality.

The model “Would it not be safer to delay the launch?” shows the complete pattern in context. Rebuild the sentence from meaning to form instead of translating each word independently.

Choice	Structure	Example
Negative question	negative auxiliary + subject + base	Would it not be safer to delay the launch?
Echo question	focused wh-word or repeated structure	They approved which version?
Embedded question	introductory frame + wh/if + statement order	Could you explain why the figures do not match?

Choose by meaning, not by surface similarity

Neighbouring structures may contain similar words but perform different jobs. Compare the three reference patterns and name the intended effect before completing the sentence.

A reliable answer explains both why the chosen form works and why a plausible alternative would change the meaning, time relation, information focus or level of certainty.

Meaning	Best route
an expected answer or persuasive assumption presented as a question	Negative question
surprise or a request to confirm one part of prior information	Echo question
a question embedded inside a polite or analytical frame	Embedded question

Register, discourse and editorial control

This grammar is especially useful in conversation, interviews, debate and professional clarification. Its value comes from helping the reader process a relationship efficiently, not from making the sentence sound artificially complex.

After editing, check recoverability, natural word order and consistency with the surrounding paragraph. If the marked structure creates ambiguity, return to a fuller or more neutral clause.

Reason through the pattern

The visual map moves from communicative purpose to structural trigger, then to the final clause. It keeps meaning and form visible at the same time so the learner can justify every choice.

01	02	03	04	05	06
negative auxiliary	subject	statement	question focus	embedded wh	statement order

DECIDE IN THIS ORDER

STEP 1

Decision 1

Identify the communicative purpose before selecting a form: ask while signalling surprise, expectation, challenge or interpersonal distance.

STEP 2

Decision 2

Locate the structural trigger and match it to one of the reference patterns.

STEP 3

Decision 3

Check time reference, clause relationships, agency and speaker commitment.

STEP 4

Decision 4

Read the complete sentence in context and confirm that its register suits conversation, interviews, debate and professional clarification.

STEP 5

Decision 5

Compare the result with a neutral alternative and keep the marked form only when it adds useful meaning.

Compare forms and meanings

Use the table to justify each structural choice.

Pattern	Form	Model
Negative question	negative auxiliary + subject + base	Would it not be safer to delay the launch?
Echo question	focused wh-word or repeated structure	They approved which version?
Embedded question	introductory frame + wh/if + statement order	Could you explain why the figures do not match?

EXAMPLES AT A GLANCE

Would it not be safer to delay the launch?	an expected answer or persuasive assumption presented as a question
They approved which version?	surprise or a request to confirm one part of prior information
Could you explain why the figures do not match?	a question embedded inside a polite or analytical frame

COMMON ERRORS

EDIT THIS

Avoid this pattern

Do not use a negative question when a neutral information request is intended.

EDIT THIS

Avoid this pattern

Do not apply ordinary wh-inversion mechanically to every echo question.

EDIT THIS

Avoid this pattern

Do not retain direct-question inversion inside the embedded clause.

Recognition in context

Choose the sentence whose grammar matches the stated communicative purpose.

A1 · MEANING DECISION 1

Which sentence best communicates this purpose: an expected answer or persuasive assumption presented as a question?

OPTIONS Would it not be safer to delay the launch? · They approved which version? · Could you explain why the figures do not match?

A2 · MEANING DECISION 2

Which sentence best communicates this purpose: surprise or a request to confirm one part of prior information?

OPTIONS They approved which version? · Could you explain why the figures do not match? · Would it not be safer to delay the launch?

A3 · MEANING DECISION 3

Which sentence best communicates this purpose: a question embedded inside a polite or analytical frame?

OPTIONS Could you explain why the figures do not match? · Would it not be safer to delay the launch? · They approved which version?

A4 · INTERPRETATION 4

What does “Would it not be safer to delay the launch?” communicate in this context?

OPTIONS an expected answer or persuasive assumption presented as a question · surprise or a request to confirm one part of prior information · a question embedded inside a polite or analytical frame

A5 · INTERPRETATION 5

What does “They approved which version?” communicate in this context?

OPTIONS surprise or a request to confirm one part of prior information · a question embedded inside a polite or analytical frame · an expected answer or persuasive assumption presented as a question

A6 · INTERPRETATION 6

What does “Could you explain why the figures do not match?” communicate in this context?

OPTIONS a question embedded inside a polite or analytical frame · an expected answer or persuasive assumption presented as a question · surprise or a request to confirm one part of prior information

STAGE CHECK

Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

Form and function

Identify both the structural family and the meaning carried by each model.

B1 · FORM AND FUNCTION 1

“Would it not be safer to delay the launch?” uses _____ to express _____.

OPTIONS Gap 1: Negative question / Echo question / Embedded question · Gap 2: an expected answer or persuasive assumption presented as a question / surprise or a request to confirm one part of prior information / a question embedded inside a polite or analytical frame

B2 · FORM AND FUNCTION 2

“They approved which version?” uses _____ to express _____.

OPTIONS Gap 1: Echo question / Embedded question / Negative question · Gap 2: surprise or a request to confirm one part of prior information / a question embedded inside a polite or analytical frame / an expected answer or persuasive assumption presented as a question

B3 · FORM AND FUNCTION 3

“Could you explain why the figures do not match?” uses _____ to express _____.

OPTIONS Gap 1: Embedded question / Negative question / Echo question · Gap 2: a question embedded inside a polite or analytical frame / an expected answer or persuasive assumption presented as a question / surprise or a request to confirm one part of prior information

STAGE CHECK

Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

Guided discourse choices

Maintain accurate form and meaning across a connected sequence of decisions.

C1 · EDITORIAL PLANNING

Choose the model that expresses an expected answer or persuasive assumption presented as a question: _____. Choose the model that expresses surprise or a request to confirm one part of prior information: _____. Choose the model that expresses a question embedded inside a polite or analytical frame: _____. Choose the model built with negative auxiliary + subject + base: _____. Choose the model built with focused wh-word or repeated structure: _____. Choose the model built with introductory frame + wh/if + statement order: _____.

_____
_____

WORD BANK

Available forms

Could you explain why the figures do not match? · They approved which version? · Would it not be safer to delay the launch?

STAGE CHECK

Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

Open reconstruction

Recover the missing structural trigger without a word bank.

D1 · INDEPENDENT RECONSTRUCTION

_____ to delay the launch? They approved _____? Could you explain _____? State the full structural pattern for Negative question: _____. State the full structural pattern for Echo question: _____.

_____
_____
_____
_____

STAGE CHECK

Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

Controlled transformation

Rewrite the neutral source so that it performs the requested advanced function.

E1 · TRANSFORMATION 1

Rewrite “Delaying the launch would probably be safer.” using the Negative question pattern to express an expected answer or persuasive assumption presented as a question.

_____
_____

E2 · TRANSFORMATION 2

Rewrite “Which version did they approve?” using the Echo question pattern to express surprise or a request to confirm one part of prior information.

_____
_____

E3 · TRANSFORMATION 3

Rewrite “Why do the figures not match?” using the Embedded question pattern to express a question embedded inside a polite or analytical frame.

_____
_____

E4 · TRANSFORMATION 4

Rewrite “Delaying the launch would probably be safer.” using the Negative question pattern to express an expected answer or persuasive assumption presented as a question.

_____
_____

STAGE CHECK

Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

Communicative production

Use the grammar independently in realistic academic, professional and conversational contexts.

F1 · PRODUCTION TASK 1

Write two connected sentences about a realistic situation. Use Negative question to express an expected answer or persuasive assumption presented as a question, then add a neutral sentence that makes the contrast clear.

_____
_____
_____

F2 · PRODUCTION TASK 2

Write two connected sentences about a realistic situation. Use Echo question to express surprise or a request to confirm one part of prior information, then add a neutral sentence that makes the contrast clear.

_____
_____
_____

F3 · PRODUCTION TASK 3

Write two connected sentences about a realistic situation. Use Embedded question to express a question embedded inside a polite or analytical frame, then add a neutral sentence that makes the contrast clear.

_____

Final self-check

Complete these prompts without reopening the guide.

R1 · REVIEW FOCUS

Explain and exemplify: communicative purpose.

_____
_____

R2 · REVIEW FOCUS

Explain and exemplify: structural trigger.

_____
_____

R3 · REVIEW FOCUS

Explain and exemplify: meaning contrast.

_____
_____

R4 · REVIEW FOCUS

Explain and exemplify: register choice.

_____
_____

R5 · REVIEW FOCUS

Apply this decision to a new example, then justify it: Identify the communicative purpose before selecting a form: ask while signalling surprise, expectation, challenge or interpersonal distance..

_____
_____

R6 · REVIEW FOCUS

Apply this decision to a new example, then justify it: Locate the structural trigger and match it to one of the reference patterns..

_____
_____

STAGE CHECK

Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

Recognition in context

Compare the form first, then read the explanation and name the rule in your own words.

A1

Would it not be safer to delay the launch?

Negative question is the best match because an expected answer or persuasive assumption presented as a question.

A2

They approved which version?

Echo question is the best match because surprise or a request to confirm one part of prior information.

A3

Could you explain why the figures do not match?

Embedded question is the best match because a question embedded inside a polite or analytical frame.

A4

an expected answer or persuasive assumption presented as a question

The Negative question pattern communicates an expected answer or persuasive assumption presented as a question.

A5

surprise or a request to confirm one part of prior information

The Echo question pattern communicates surprise or a request to confirm one part of prior information.

A6

a question embedded inside a polite or analytical frame

The Embedded question pattern communicates a question embedded inside a polite or analytical frame.

Form and function

Compare the form first, then read the explanation and name the rule in your own words.

B1

Negative question / an expected answer or persuasive assumption presented as a question

The structure belongs to the Negative question pattern. Its communicative purpose is an expected answer or persuasive assumption presented as a question.

B2

Echo question / surprise or a request to confirm one part of prior information

The structure belongs to the Echo question pattern. Its communicative purpose is surprise or a request to confirm one part of prior information.

B3

Embedded question / a question embedded inside a polite or analytical frame

The structure belongs to the Embedded question pattern. Its communicative purpose is a question embedded inside a polite or analytical frame.

Guided discourse choices

Compare the form first, then read the explanation and name the rule in your own words.

C1

Would it not be safer to delay the launch?

Negative question: negative auxiliary + subject + base.

C2

They approved which version?

Echo question: focused wh-word or repeated structure.

C3

Could you explain why the figures do not match?

Embedded question: introductory frame + wh/if + statement order.

C4

Would it not be safer to delay the launch?

Negative question: negative auxiliary + subject + base.

C5

They approved which version?

Echo question: focused wh-word or repeated structure.

C6

Could you explain why the figures do not match?

Embedded question: introductory frame + wh/if + statement order.

Open reconstruction

Compare the form first, then read the explanation and name the rule in your own words.

D1

Would it not be safer

Negative question requires “Would it not be safer” in this model. negative auxiliary + subject + base.

D2

which version

Echo question requires “which version” in this model. focused wh-word or repeated structure.

D3

why the figures do not match

Embedded question requires “why the figures do not match” in this model. introductory frame + wh/if + statement order.

D4

negative auxiliary + subject + base

Negative question is built as negative auxiliary + subject + base.

D5

focused wh-word or repeated structure

Echo question is built as focused wh-word or repeated structure.

Controlled transformation

Compare the form first, then read the explanation and name the rule in your own words.

E1

Would it not be safer to delay the launch?

negative auxiliary + subject + base. The rewrite preserves the core message while adding the intended negative question effect.

E2

They approved which version?

focused wh-word or repeated structure. The rewrite preserves the core message while adding the intended echo question effect.

E3

Could you explain why the figures do not match?

introductory frame + wh/if + statement order. The rewrite preserves the core message while adding the intended embedded question effect.

E4

Would it not be safer to delay the launch?

negative auxiliary + subject + base. The rewrite preserves the core message while adding the intended negative question effect.

Communicative production

Compare the form first, then read the explanation and name the rule in your own words.

F1

Would it not be safer to delay the launch? The surrounding context would then state the same situation in neutral order or with a less marked commitment.

A strong response uses negative auxiliary + subject + base accurately and makes the communicative purpose visible in context.

F2

They approved which version? The surrounding context would then state the same situation in neutral order or with a less marked commitment.

A strong response uses focused wh-word or repeated structure accurately and makes the communicative purpose visible in context.

F3

Could you explain why the figures do not match? The surrounding context would then state the same situation in neutral order or with a less marked commitment.

A strong response uses introductory frame + wh/if + statement order accurately and makes the communicative purpose visible in context.

07 · FEEDBACK

Diagnose the pattern, not only the score

Use this page to decide what to revisit in the complete guide.

CHECK · TRIGGER OR CONTEXT
