Cleft sentences

Cleft sentences do not normally add a new fact. They reorganise a message so the reader knows exactly which person, time, place or result carries the contrast.

THE CENTRAL IDEA

Control which information the speaker presents as contrast or focus.

Divide one proposition into two clauses to control focus: It was Maya who found the error; What we need is more time.

MODEL

Maya found the error. -> It was Maya who found the error.

it + be + focus + relative clause | what-clause + be + focus

6 GUIDED STAGES · 29 LEARNING DECISIONS

This complete guide combines explanation, visual reasoning, practice and feedback. Separate exercise and answer-key editions are also available from the lesson page.

LEARNING OUTCOMES

Outcome 1	Outcome 2	Outcome 3
Identify the element that deserves contrastive focus.	Build natural it-clefts, what-clefts and all-clefts.	Use agreement and relative clauses accurately without redundant pronouns.

Build meaning before form

Divide one proposition into two clauses to control focus: It was Maya who found the error; What we need is more time.

How an it-cleft creates contrast

In It was Thursday that we met, the focused constituent appears between be and the relative clause. The sentence naturally answers an implicit contrast such as Thursday, not Wednesday.

The focused element can be a person, object, time, place or prepositional phrase. The underlying proposition remains the same; its information structure changes.

Maya found the error.	It was Maya who found the error.
We met on Friday.	It was on Friday that we met.

What-clefts present needs and results

What the team needs is clearer guidance prepares the reader for new information after be. This pattern is common in explanations, meetings and argumentative writing.

The what-clause functions as a nominal subject. Agreement normally follows the focused complement, although singular is common when the complement is treated as one idea.

Neutral statement	Cleft sentence
We need a decision.	What we need is a decision.
Ana solved the issue.	It was Ana who solved the issue.

Focus must answer an implicit question

A natural cleft responds to an information gap: who did it, when did it happen, where did it happen, or what is needed? Without that contrast, the structure can sound heavy.

Use prosody in speech and punctuation in writing to support the intended focus; grammar alone cannot rescue an unclear contrast.

From emphasis to cohesion

Clefts can connect a paragraph by turning known material into the frame and placing the important new point at the end. That end-focus makes dense explanations easier to process.

Vary clefts with neutral clauses. Repetition reduces their rhetorical force and can make prose sound artificially dramatic.

Reason through the pattern

The frame moves the spotlight to a person, time, place or result without changing the core fact. First recover the neutral proposition, then identify the intended contrast.

DECIDE IN THIS ORDER

STEP 1

Decision 1

Choose the element that needs emphasis before changing the sentence.

STEP 2

Decision 2

Use an it-cleft for a specific contrast of person, time, place or object.

STEP 3

Decision 3

Use a what-cleft to foreground an action, need or result.

STEP 4

Decision 4

Check agreement and remove any repeated pronoun from the relative clause.

Compare forms and meanings

Use the table to justify each structural choice.

Type	Structure	Example
it-cleft	it + be + focus + relative	It was Ana who called.
what-cleft	what + clause + be + focus	What I need is a break.
all-cleft	all + clause + be + focus	All we need is time.

EXAMPLES AT A GLANCE

Maya found the error.	It was Maya who...
We need clarity.	What we need is...
We met on Friday.	It was on Friday that...
