ENGLISH C1 · ADVANCED GRAMMAR

# Advanced condition and concession

Use even if, whether or not, however plus adjective and no matter constructions to express robust conditions and concessions. The lesson connects form, meaning, register and real editorial decisions rather than treating the pattern as an isolated rule.

THE CENTRAL IDEA

Use advanced condition and concession to show that an outcome remains valid across alternatives or despite an extreme circumstance while preserving the intended meaning and register.

Use even if, whether or not, however plus adjective and no matter constructions to express robust conditions and concessions.

MODEL

Whether or not demand rises, the infrastructure must be upgraded.

even if / whether or not + clause | however + adjective/adverb + clause

6 GUIDED STAGES · 30 LEARNING DECISIONS

This complete guide combines explanation, visual reasoning, practice and feedback. Separate exercise and answer-key editions are also available from the lesson page.

LEARNING OUTCOMES

| | |
|---|---|
| Outcome 1<br>Recognise the main advanced condition and concession patterns in authentic contexts. | Outcome 2<br>Choose a form that accurately expresses show that an outcome remains valid across alternatives or despite an extreme circumstance. |
| Outcome 3<br>Avoid errors that change time, agency, emphasis or speaker commitment. | Outcome 4<br>Use the structure appropriately in argument, policy, negotiation and careful generalisation. |

# Build meaning before form

Use even if, whether or not, however plus adjective and no matter constructions to express robust conditions and concessions.

# What advanced condition and concession communicates

Use even if, whether or not, however plus adjective and no matter constructions to express robust conditions and concessions.

The central purpose is to show that an outcome remains valid across alternatives or despite an extreme circumstance. A successful choice therefore preserves the proposition while making the intended relationship, viewpoint or degree of commitment visible to the reader.

| The policy will continue even if demand falls. | an outcome unchanged by a possible condition |
|---|---|
| Whether or not demand rises, the infrastructure must be upgraded. | the same result across both alternatives |
| However carefully the system is designed, some risk will remain. | a conclusion valid at every degree on a scale |

# How the pattern is built

Use this working formula: even if / whether or not + clause | however + adjective/adverb + clause. The formula is a decision path: it identifies the trigger, the clause architecture and the element that carries tense or modality.

The model “Whether or not demand rises, the infrastructure must be upgraded.” shows the complete pattern in context. Rebuild the sentence from meaning to form instead of translating each word independently.

| Choice | Structure | Example |
|---|---|---|
| Robust condition | even if + clause | The policy will continue even if demand falls. |
| Exhaustive alternatives | whether or not + clause | Whether or not demand rises, the infrastructure must be upgraded. |
| Degree concession | however + adjective/adverb + subject + verb | However carefully the system is designed, some risk will remain. |

# Choose by meaning, not by surface similarity

Neighbouring structures may contain similar words but perform different jobs. Compare the three reference patterns and name the intended effect before completing the sentence.

A reliable answer explains both why the chosen form works and why a plausible alternative would change the meaning, time relation, information focus or level of certainty.

| Meaning | Best route |
| --- | --- |
| an outcome unchanged by a possible condition | Robust condition |
| the same result across both alternatives | Exhaustive alternatives |
| a conclusion valid at every degree on a scale | Degree concession |

# Register, discourse and editorial control

This grammar is especially useful in argument, policy, negotiation and careful generalisation. Its value comes from helping the reader process a relationship efficiently, not from making the sentence sound artificially complex.

After editing, check recoverability, natural word order and consistency with the surrounding paragraph. If the marked structure creates ambiguity, return to a fuller or more neutral clause.

# Reason through the pattern

The visual map moves from communicative purpose to structural trigger, then to the final clause. It keeps meaning and form visible at the same time so the learner can justify every choice.

| 01 | 02 | 03 | 04 | 05 |
|---|---|---|---|---|
| even if / whether or not | clause | however | adjective/adverb | clause |

## DECIDE IN THIS ORDER

STEP 1

### Decision 1

Identify the communicative purpose before selecting a form: show that an outcome remains valid across alternatives or despite an extreme circumstance.

STEP 2

### Decision 2

Locate the structural trigger and match it to one of the reference patterns.

STEP 3

### Decision 3

Check time reference, clause relationships, agency and speaker commitment.

STEP 4

### Decision 4

Read the complete sentence in context and confirm that its register suits argument, policy, negotiation and careful generalisation.

STEP 5

### Decision 5

Compare the result with a neutral alternative and keep the marked form only when it adds useful meaning.

# Compare forms and meanings

Use the table to justify each structural choice.

| Pattern | Form | Model |
|---|---|---|
| Robust condition | even if + clause | The policy will continue even if demand falls. |
| Exhaustive alternatives | whether or not + clause | Whether or not demand rises, the infrastructure must be upgraded. |
| Degree concession | however + adjective/adverb + subject + verb | However carefully the system is designed, some risk will remain. |

## EXAMPLES AT A GLANCE

| | |
|---|---|
| The policy will continue even if demand falls. | an outcome unchanged by a possible condition |
| Whether or not demand rises, the infrastructure must be upgraded. | the same result across both alternatives |
| However carefully the system is designed, some risk will remain. | a conclusion valid at every degree on a scale |

## COMMON ERRORS

EDIT THIS

### Avoid this pattern

Do not use even though when the condition is hypothetical rather than factual.

EDIT THIS

### Avoid this pattern

Do not repeat or not unnecessarily when whether already introduces an embedded choice unless emphasis requires it.

EDIT THIS

### Avoid this pattern

Do not confuse concessive however with the sentence connector however.

# Recognition in context

Choose the sentence whose grammar matches the stated communicative purpose.

A1 · MEANING DECISION 1

Which sentence best communicates this purpose: an outcome unchanged by a possible condition?

OPTIONS The policy will continue even if demand falls. · Whether or not demand rises, the infrastructure must be upgraded. · However carefully the system is designed, some risk will remain.

A2 · MEANING DECISION 2

Which sentence best communicates this purpose: the same result across both alternatives?

OPTIONS Whether or not demand rises, the infrastructure must be upgraded. · However carefully the system is designed, some risk will remain. · The policy will continue even if demand falls.

A3 · MEANING DECISION 3

Which sentence best communicates this purpose: a conclusion valid at every degree on a scale?

OPTIONS However carefully the system is designed, some risk will remain. · The policy will continue even if demand falls. · Whether or not demand rises, the infrastructure must be upgraded.

A4 · INTERPRETATION 4

What does “The policy will continue even if demand falls.” communicate in this context?

OPTIONS an outcome unchanged by a possible condition · the same result across both alternatives · a conclusion valid at every degree on a scale

A5 · INTERPRETATION 5

What does “Whether or not demand rises, the infrastructure must be upgraded.” communicate in this context?

OPTIONS the same result across both alternatives · a conclusion valid at every degree on a scale · an outcome unchanged by a possible condition

A6 · INTERPRETATION 6

What does “However carefully the system is designed, some risk will remain.” communicate in this context?

OPTIONS a conclusion valid at every degree on a scale · an outcome unchanged by a possible condition · the same result across both alternatives

STAGE CHECK

## Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

# Form and function

Identify both the structural family and the meaning carried by each model.

B1 · FORM AND FUNCTION 1

“The policy will continue even if demand falls.” uses _____ to express _____.

OPTIONS Gap 1: Robust condition / Exhaustive alternatives / Degree concession · Gap 2: an outcome unchanged by a possible condition / the same result across both alternatives / a conclusion valid at every degree on a scale

B2 · FORM AND FUNCTION 2

“Whether or not demand rises, the infrastructure must be upgraded.” uses _____ to express _____.

OPTIONS Gap 1: Exhaustive alternatives / Degree concession / Robust condition · Gap 2: the same result across both alternatives / a conclusion valid at every degree on a scale / an outcome unchanged by a possible condition

B3 · FORM AND FUNCTION 3

“However carefully the system is designed, some risk will remain.” uses _____ to express _____.

OPTIONS Gap 1: Degree concession / Robust condition / Exhaustive alternatives · Gap 2: a conclusion valid at every degree on a scale / an outcome unchanged by a possible condition / the same result across both alternatives

STAGE CHECK

## Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

# Guided discourse choices

Maintain accurate form and meaning across a connected sequence of decisions.

C1 · EDITORIAL PLANNING

Choose the model that expresses an outcome unchanged by a possible condition: _____. Choose the model that expresses the same result across both alternatives: _____. Choose the model that expresses a conclusion valid at every degree on a scale: _____. Choose the model built with even if + clause: _____. Choose the model built with whether or not + clause: _____. Choose the model built with however + adjective/adverb + subject + verb: _____.

_____
_____

WORD BANK

## Available forms

However carefully the system is designed, some risk will remain. · The policy will continue even if demand falls. · Whether or not demand rises, the infrastructure must be upgraded.

STAGE CHECK

## Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

# Open reconstruction

Recover the missing structural trigger without a word bank.

D1 · INDEPENDENT RECONSTRUCTION

The policy will continue _____. _____, the infrastructure must be upgraded. _____ the system is designed, some risk will remain. State the full structural pattern for Robust condition: _____. State the full structural pattern for Exhaustive alternatives: _____.

_____
_____
_____
_____

STAGE CHECK

## Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

# Controlled transformation

Rewrite the neutral source so that it performs the requested advanced function.

E1 · TRANSFORMATION 1

Rewrite “Falling demand would not stop the policy.” using the Robust condition pattern to express an outcome unchanged by a possible condition.

_____
_____

E2 · TRANSFORMATION 2

Rewrite “The upgrade is required in either demand scenario.” using the Exhaustive alternatives pattern to express the same result across both alternatives.

_____
_____

E3 · TRANSFORMATION 3

Rewrite “Even a very careful design cannot remove all risk.” using the Degree concession pattern to express a conclusion valid at every degree on a scale.

_____
_____

E4 · TRANSFORMATION 4

Rewrite “Falling demand would not stop the policy.” using the Robust condition pattern to express an outcome unchanged by a possible condition.

_____
_____

STAGE CHECK

### Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

# Communicative production

Use the grammar independently in realistic academic, professional and conversational contexts.

F1 · PRODUCTION TASK 1

Write two connected sentences about a realistic situation. Use Robust condition to express an outcome unchanged by a possible condition, then add a neutral sentence that makes the contrast clear.

_____
_____
_____

F2 · PRODUCTION TASK 2

Write two connected sentences about a realistic situation. Use Exhaustive alternatives to express the same result across both alternatives, then add a neutral sentence that makes the contrast clear.

_____
_____
_____

F3 · PRODUCTION TASK 3

Write two connected sentences about a realistic situation. Use Degree concession to express a conclusion valid at every degree on a scale, then add a neutral sentence that makes the contrast clear.

# Final self-check

Complete these prompts without reopening the guide.

R1 · REVIEW FOCUS

Explain and exemplify: communicative purpose.

_____
_____

R2 · REVIEW FOCUS

Explain and exemplify: structural trigger.

_____
_____

R3 · REVIEW FOCUS

Explain and exemplify: meaning contrast.

_____
_____

R4 · REVIEW FOCUS

Explain and exemplify: register choice.

_____
_____

R5 · REVIEW FOCUS

Apply this decision to a new example, then justify it: Identify the communicative purpose before selecting a form: show that an outcome remains valid across alternatives or despite an extreme circumstance..

_____
_____

R6 · REVIEW FOCUS

Apply this decision to a new example, then justify it: Locate the structural trigger and match it to one of the reference patterns..

_____
_____

STAGE CHECK

## Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

# Recognition in context

Compare the form first, then read the explanation and name the rule in your own words.

A1

The policy will continue even if demand falls.

Robust condition is the best match because an outcome unchanged by a possible condition.

A2

Whether or not demand rises, the infrastructure must be upgraded.

Exhaustive alternatives is the best match because the same result across both alternatives.

A3

However carefully the system is designed, some risk will remain.

Degree concession is the best match because a conclusion valid at every degree on a scale.

A4

an outcome unchanged by a possible condition

The Robust condition pattern communicates an outcome unchanged by a possible condition.

A5

the same result across both alternatives

The Exhaustive alternatives pattern communicates the same result across both alternatives.

A6

a conclusion valid at every degree on a scale

The Degree concession pattern communicates a conclusion valid at every degree on a scale.

# Form and function

Compare the form first, then read the explanation and name the rule in your own words.

B1

### Robust condition / an outcome unchanged by a possible condition

The structure belongs to the Robust condition pattern. Its communicative purpose is an outcome unchanged by a possible condition.

B2

### Exhaustive alternatives / the same result across both alternatives

The structure belongs to the Exhaustive alternatives pattern. Its communicative purpose is the same result across both alternatives.

B3

### Degree concession / a conclusion valid at every degree on a scale

The structure belongs to the Degree concession pattern. Its communicative purpose is a conclusion valid at every degree on a scale.

# Guided discourse choices

Compare the form first, then read the explanation and name the rule in your own words.

C1

The policy will continue even if demand falls.

Robust condition: even if + clause.

C2

Whether or not demand rises, the infrastructure must be upgraded.

Exhaustive alternatives: whether or not + clause.

C3

However carefully the system is designed, some risk will remain.

Degree concession: however + adjective/adverb + subject + verb.

C4

The policy will continue even if demand falls.

Robust condition: even if + clause.

C5

Whether or not demand rises, the infrastructure must be upgraded.

Exhaustive alternatives: whether or not + clause.

C6

However carefully the system is designed, some risk will remain.

Degree concession: however + adjective/adverb + subject + verb.

# Open reconstruction

Compare the form first, then read the explanation and name the rule in your own words.

D1

even if demand falls

Robust condition requires “even if demand falls” in this model. even if + clause.

D2

Whether or not demand rises

Exhaustive alternatives requires “Whether or not demand rises” in this model. whether or not + clause.

D3

However carefully

Degree concession requires “However carefully” in this model. however + adjective/adverb + subject + verb.

D4

even if + clause

Robust condition is built as even if + clause.

D5

whether or not + clause

Exhaustive alternatives is built as whether or not + clause.

# Controlled transformation

Compare the form first, then read the explanation and name the rule in your own words.

E1

The policy will continue even if demand falls.

even if + clause. The rewrite preserves the core message while adding the intended robust condition effect.

E2

Whether or not demand rises, the infrastructure must be upgraded.

whether or not + clause. The rewrite preserves the core message while adding the intended exhaustive alternatives effect.

E3

However carefully the system is designed, some risk will remain.

however + adjective/adverb + subject + verb. The rewrite preserves the core message while adding the intended degree concession effect.

E4

The policy will continue even if demand falls.

even if + clause. The rewrite preserves the core message while adding the intended robust condition effect.

# Communicative production

Compare the form first, then read the explanation and name the rule in your own words.

F1

The policy will continue even if demand falls. The surrounding context would then state the same situation in neutral order or with a less marked commitment.

A strong response uses even if + clause accurately and makes the communicative purpose visible in context.

F2

Whether or not demand rises, the infrastructure must be upgraded. The surrounding context would then state the same situation in neutral order or with a less marked commitment.

A strong response uses whether or not + clause accurately and makes the communicative purpose visible in context.

F3

However carefully the system is designed, some risk will remain. The surrounding context would then state the same situation in neutral order or with a less marked commitment.

A strong response uses however + adjective/adverb + subject + verb accurately and makes the communicative purpose visible in context.

07 · FEEDBACK

# Diagnose the pattern, not only the score

Use this page to decide what to revisit in the complete guide.
