Nominalisation

Nominalisation can make reasoning compact and cohesive, but excessive noun-heavy writing hides agency and weakens the verbs that carry a sentence forward.

THE CENTRAL IDEA

Package a process as a noun while preserving meaning, agency and logical relationships.

Turn processes and qualities into noun phrases to condense information, connect arguments and shift focus in formal texts.

MODEL

The committee rejected the plan. -> The committee's rejection of the plan...

verb/adjective -> noun phrase + precise support

6 GUIDED STAGES · 29 LEARNING DECISIONS

This complete guide combines explanation, visual reasoning, practice and feedback. Separate exercise and answer-key editions are also available from the lesson page.

LEARNING OUTCOMES

Outcome 1	Outcome 2	Outcome 3
Form accurate noun phrases from verbs and adjectives.	Use nominalisation to package known information and build cohesion.	Decide when a direct verb is clearer than a dense noun phrase.

Build meaning before form

Turn processes and qualities into noun phrases to condense information, connect arguments and shift focus in formal texts.

What nominalisation changes

The committee rejected the proposal presents an action. The committee's rejection of the proposal packages that action as a thing that can become the subject, object or reference point of another sentence.

This grammatical shift changes information flow, not merely vocabulary.

Cohesion through information packaging

A previous proposition can be compressed into a noun phrase: The service expanded rapidly. This expansion created new roles. The noun phrase points backwards and opens space for the next claim.

Effective academic writing alternates between processes expressed as verbs and concepts expressed as nouns.

Clause	Packaged reference
The system failed.	the system's failure
Access improved.	the improvement in access
The policy was effective.	the effectiveness of the policy

Agency and responsibility

The destruction of the records removes the actor unless a by-phrase or possessive restores it. When accountability matters, name the agent: the contractor's destruction of the records.

Impersonal style is a rhetorical choice, not an automatic sign of formality.

Control density with strong verbs

A sentence such as The implementation of the evaluation of the provision is difficult to process because nouns bury every action. Recasting one or two nouns as verbs restores movement and clarity.

Use nominalisation to organise an argument, not to decorate it.

02 · VISUAL MAP

Reason through the pattern

The visual turns an action into a labelled package that can be moved through a paragraph. A second checkpoint asks whether the agent and main verb remain visible.

DECIDE IN THIS ORDER

STEP 1

Decision 1

Identify the process or quality you want to treat as a concept.

STEP 2

Decision 2

Choose the correct noun form and its preposition or complement.

STEP 3

Decision 3

Decide whether the agent should remain visible.

STEP 4

Decision 4

Read for density: restore a verb if the sentence becomes abstract or unclear.

Compare forms and meanings

Use the table to justify each structural choice.

Source	Nominalisation	Example
decide	decision	the committee's decision
expand	expansion	the expansion of the service
available	availability	the availability of data

EXAMPLES AT A GLANCE

the system failed	the system's failure
access improved	the improvement in access
the policy was effective	the policy's effectiveness

COMMON ERRORS

EDIT THIS

Avoid this pattern

Using the wrong derived noun or preposition.

EDIT THIS

Avoid this pattern

Removing the agent when responsibility matters.

EDIT THIS

Avoid this pattern

Stacking several abstract nouns without a clear main verb.

Recognition in context

Choose the form that completes each situation naturally.

STAGE CHECK

Pause before continuing

Underline the trigger or decision point, name the rule, and check that the meaning has not changed.

Recognition in context

Compare the form first, then read the explanation and name the rule in your own words.

A1

decision

Use “decision”. Identify the process or quality you want to treat as a concept.

A2

analysis

Use “analysis”. Choose the correct noun form and its preposition or complement.

A3

availability

Use “availability”. Decide whether the agent should remain visible.

A4

failure

Use “failure”. Read for density: restore a verb if the sentence becomes abstract or unclear.

A5

implementation

Use “implementation”. Identify the process or quality you want to treat as a concept.

A6

by

Use “by”. Choose the correct noun form and its preposition or complement.

Two connected decisions

Compare the form first, then read the explanation and name the rule in your own words.

B1

analysis / identification

Use “analysis”. Identify the process or quality you want to treat as a concept. Use “identification”. Choose the correct noun form and its preposition or complement.

B2

decision / rejection

Use “decision”. Choose the correct noun form and its preposition or complement. Use “rejection”. Decide whether the agent should remain visible.
