Relative clauses in discourse

Use sentential which, nominal relatives and complex preposition relatives to connect evaluation and reference across clauses. The lesson connects form, meaning, register and real editorial decisions rather than treating the pattern as an isolated rule.

THE CENTRAL IDEA

Use relative clauses in discourse to comment on a whole proposition or package an unspecified referent as a clause while preserving the intended meaning and register.

Use sentential which, nominal relatives and complex preposition relatives to connect evaluation and reference across clauses.

MODEL

The deadline was extended, which gave the team time to retest.

clause, which + comment | what/where/how + clause | prep + which/whom

6 GUIDED STAGES · 30 LEARNING DECISIONS

This complete guide combines explanation, visual reasoning, practice and feedback. Separate exercise and answer-key editions are also available from the lesson page.

LEARNING OUTCOMES

Outcome 1 Recognise the main relative clauses in discourse patterns in authentic contexts.	Outcome 2 Choose a form that accurately expresses comment on a whole proposition or package an unspecified referent as a clause.
Outcome 3 Avoid errors that change time, agency, emphasis or speaker commitment.	Outcome 4 Use the structure appropriately in analytical writing, narrative commentary and formal explanation.

Build meaning before form

Use sentential which, nominal relatives and complex preposition relatives to connect evaluation and reference across clauses.

What relative clauses in discourse communicates

Use sentential which, nominal relatives and complex preposition relatives to connect evaluation and reference across clauses.

The central purpose is to comment on a whole proposition or package an unspecified referent as a clause. A successful choice therefore preserves the proposition while making the intended relationship, viewpoint or degree of commitment visible to the reader.

The deadline was extended, which gave the team time to retest.	a comment on the entire preceding proposition
What the review revealed was a failure of oversight.	an unspecified thing or idea functioning as a noun phrase
The principles on the basis of which the decision was made remain unclear.	a formal relationship expressed by a multiword preposition

How the pattern is built

Use this working formula: clause, which + comment | what/where/how + clause | prep + which/whom. The formula is a decision path: it identifies the trigger, the clause architecture and the element that carries tense or modality.

The model “The deadline was extended, which gave the team time to retest.” shows the complete pattern in context. Rebuild the sentence from meaning to form instead of translating each word independently.

Choice	Structure	Example
Sentential relative	clause, which + comment	The deadline was extended, which gave the team time to retest.
Nominal relative	what/where/how + clause	What the review revealed was a failure of oversight.
Complex preposition relative	preposition phrase + which/whom	The principles on the basis of which the decision was made remain unclear.

Choose by meaning, not by surface similarity

Neighbouring structures may contain similar words but perform different jobs. Compare the three reference patterns and name the intended effect before completing the sentence.

A reliable answer explains both why the chosen form works and why a plausible alternative would change the meaning, time relation, information focus or level of certainty.

Meaning	Best route
a comment on the entire preceding proposition	Sentential relative
an unspecified thing or idea functioning as a noun phrase	Nominal relative
a formal relationship expressed by a multiword preposition	Complex preposition relative

Register, discourse and editorial control

This grammar is especially useful in analytical writing, narrative commentary and formal explanation. Its value comes from helping the reader process a relationship efficiently, not from making the sentence sound artificially complex.

After editing, check recoverability, natural word order and consistency with the surrounding paragraph. If the marked structure creates ambiguity, return to a fuller or more neutral clause.

Reason through the pattern

The visual map moves from communicative purpose to structural trigger, then to the final clause. It keeps meaning and form visible at the same time so the learner can justify every choice.

DECIDE IN THIS ORDER

STEP 1

Decision 1

Identify the communicative purpose before selecting a form: comment on a whole proposition or package an unspecified referent as a clause.

STEP 2

Decision 2

Locate the structural trigger and match it to one of the reference patterns.

STEP 3

Decision 3

Check time reference, clause relationships, agency and speaker commitment.

STEP 4

Decision 4

Read the complete sentence in context and confirm that its register suits analytical writing, narrative commentary and formal explanation.

STEP 5

Decision 5

Compare the result with a neutral alternative and keep the marked form only when it adds useful meaning.

Compare forms and meanings

Use the table to justify each structural choice.

Pattern	Form	Model
Sentential relative	clause, which + comment	The deadline was extended, which gave the team time to retest.
Nominal relative	what/where/how + clause	What the review revealed was a failure of oversight.
Complex preposition relative	preposition phrase + which/whom	The principles on the basis of which the decision was made remain unclear.
