ENGLISH C1 · ADVANCED GRAMMAR

Subjunctive and formulaic clauses

Use the mandative subjunctive and fixed irrealis forms after recommendations, demands and formal expressions. The lesson connects form, meaning, register and real editorial decisions rather than treating the pattern as an isolated rule.

THE CENTRAL IDEA

Use subjunctive and formulaic clauses to state required or recommended action without tense marking inside the subordinate clause while preserving the intended meaning and register.

Use the mandative subjunctive and fixed irrealis forms after recommendations, demands and formal expressions.

MODEL

The panel recommended that the application be reconsidered.

recommend/essential + that + subject + base verb

6 GUIDED STAGES · 30 LEARNING DECISIONS

This complete guide combines explanation, visual reasoning, practice and feedback. Separate exercise and answer-key editions are also available from the lesson page.

LEARNING OUTCOMES

Outcome 1 Recognise the main subjunctive and formulaic clauses patterns in authentic contexts.	Outcome 2 Choose a form that accurately expresses state required or recommended action without tense marking inside the subordinate clause.
Outcome 3 Avoid errors that change time, agency, emphasis or speaker commitment.	Outcome 4 Use the structure appropriately in formal recommendations, policy, legal drafting and institutional english.

Build meaning before form

Use the mandative subjunctive and fixed irrealis forms after recommendations, demands and formal expressions.

What subjunctive and formulaic clauses communicates

Use the mandative subjunctive and fixed irrealis forms after recommendations, demands and formal expressions.

The central purpose is to state required or recommended action without tense marking inside the subordinate clause. A successful choice therefore preserves the proposition while making the intended relationship, viewpoint or degree of commitment visible to the reader.

The panel recommended that the application be reconsidered.	a formal recommendation for an action
It is essential that every member remain independent.	a requirement framed as essential
The timetable can be revised, if need be.	a conventional formal irrealis expression

How the pattern is built

Use this working formula: recommend/essential + that + subject + base verb. The formula is a decision path: it identifies the trigger, the clause architecture and the element that carries tense or modality.

The model “The panel recommended that the application be reconsidered.” shows the complete pattern in context. Rebuild the sentence from meaning to form instead of translating each word independently.

Choice	Structure	Example
Mandative subjunctive	verb + that + subject + base verb	The panel recommended that the application be reconsidered.
Adjectival mandate	it is essential + that + subject + base verb	It is essential that every member remain independent.
Fixed irrealis	if need be / be that as it may	The timetable can be revised, if need be.

Choose by meaning, not by surface similarity

Neighbouring structures may contain similar words but perform different jobs. Compare the three reference patterns and name the intended effect before completing the sentence.

A reliable answer explains both why the chosen form works and why a plausible alternative would change the meaning, time relation, information focus or level of certainty.

Meaning	Best route
a formal recommendation for an action	Mandative subjunctive
a requirement framed as essential	Adjectival mandate
a conventional formal irrealis expression	Fixed irrealis

Register, discourse and editorial control

This grammar is especially useful in formal recommendations, policy, legal drafting and institutional english. Its value comes from helping the reader process a relationship efficiently, not from making the sentence sound artificially complex.

After editing, check recoverability, natural word order and consistency with the surrounding paragraph. If the marked structure creates ambiguity, return to a fuller or more neutral clause.

Reason through the pattern

The visual map moves from communicative purpose to structural trigger, then to the final clause. It keeps meaning and form visible at the same time so the learner can justify every choice.

DECIDE IN THIS ORDER

STEP 1

Decision 1

Identify the communicative purpose before selecting a form: state required or recommended action without tense marking inside the subordinate clause.

STEP 2

Decision 2

Locate the structural trigger and match it to one of the reference patterns.

STEP 3

Decision 3

Check time reference, clause relationships, agency and speaker commitment.

STEP 4

Decision 4

Read the complete sentence in context and confirm that its register suits formal recommendations, policy, legal drafting and institutional english.

STEP 5

Decision 5

Compare the result with a neutral alternative and keep the marked form only when it adds useful meaning.

Compare forms and meanings

Use the table to justify each structural choice.

Pattern	Form	Model
Mandative subjunctive	verb + that + subject + base verb	The panel recommended that the application be reconsidered.
Adjectival mandate	it is essential + that + subject + base verb	It is essential that every member remain independent.
Fixed irrealis	if need be / be that as it may	The timetable can be revised, if need be.

EXAMPLES AT A GLANCE

The panel recommended that the application be reconsidered.	a formal recommendation for an action
