ENGLISH C2 · ADVANCED GRAMMAR

Ellipsis and substitution

Advanced cohesion often depends on what speakers choose not to repeat. Ellipsis leaves a grammatical gap; substitution installs a compact form that points back to an earlier expression.

THE CENTRAL IDEA

Reduce repetition while keeping the missing or substituted meaning fully recoverable.

Remove recoverable material or replace it with one, ones, do so, so and not while preserving reference, contrast and register.

MODEL

I ordered the red one; Maya did too.

recoverable structure -> omission | repeated constituent -> substitute form

6 GUIDED STAGES · 29 LEARNING DECISIONS

This complete guide combines explanation, visual reasoning, practice and feedback. Separate exercise and answer-key editions are also available from the lesson page.

LEARNING OUTCOMES

Outcome 1	Outcome 2	Outcome 3
Distinguish ellipsis from substitution.	Recover omitted material without losing reference.	Choose natural devices for conversation, formal prose and comparison.

Build meaning before form

Remove recoverable material or replace it with one, ones, do so, so and not while preserving reference, contrast and register.

Ellipsis and substitution are different operations

In Maya can sing and Leo can too, the repeated verb phrase is omitted after can: this is ellipsis. In I need a pen; do you have one?, one replaces the noun phrase: this is substitution.

Both create cohesion, but they obey different structural restrictions.

Recoverability is the central test

A listener must be able to reconstruct the intended material from the grammar and discourse. If two possible antecedents compete, the shorter version becomes ambiguous rather than elegant.

Parallel structure, agreement and contrast all help the reader recover what is absent.

Question	Check
What is missing?	identify the repeated constituent
Where is its antecedent?	locate the recoverable source
Could another reading fit?	remove ambiguity

Choosing among one, do so and so

One and ones substitute for count noun phrases. Do so replaces a verb phrase, especially in planned or formal prose. So and not substitute for whole propositions after verbs such as think, hope, suppose and expect.

Lexical choice and register matter: She said she would and She undertook to do so are both cohesive, but they belong to different contexts.

Natural economy, not mechanical deletion

Not every repetition is a flaw. Repeating a key noun can protect clarity across a long paragraph, and full wording can carry emphasis that ellipsis would remove.

Use economy where the relationship remains immediate and unmistakable.

Reason through the pattern

The bridge connects an antecedent to either a licensed gap or a substitute. The learner checks reference first, then selects the grammatical device.

DECIDE IN THIS ORDER

STEP 1

Decision 1

Identify exactly which words are repeated.

STEP 2

Decision 2

Check that the antecedent is unambiguous.

STEP 3

Decision 3

Choose ellipsis when the grammar licences an empty position.

STEP 4

Decision 4

Choose one, do so, so or not when an explicit substitute improves cohesion.

Compare forms and meanings

Use the table to justify each structural choice.

Device	Target	Example
one/ones	count noun phrase	the red one
do so	verb phrase/event	They agreed to do so.
so/not	proposition	I think so. / I hope not.
ellipsis	recoverable clause material	Maya can, but Leo can't.

EXAMPLES AT A GLANCE

the red dress	the red one
complete the form	do so
Will it work?	I think so.
Maya can sing.	Leo can too.
