Comprensión auditiva - Módulo 1 - Elegir una respuesta

01 Elegir una respuesta 1

Excuse me, could you tell me where the reading room is?

02 Elegir una respuesta 2

Would you be able to drive me to the airport tomorrow morning?

03 Elegir una respuesta 3

Do you know what time the shop opens in the morning?

04 Elegir una respuesta 4

This box is so heavy! Could you give me a hand carrying it up?

05 Elegir una respuesta 5

So, did you make the team?

06 Elegir una respuesta 6

Have you finished reserving the equipment for Friday?

07 Elegir una respuesta 7

Why is the north entrance locked?

08 Elegir una respuesta 8

Would you prefer the window seat or the aisle?

Comprensión auditiva - Módulo 1 - Audios extensos

09 Comprensión auditiva - Conversación

Student: Hi, I borrowed a book last month, and I just realized it's overdue. I'm really sorry - I completely lost track of time.

Librarian: No problem, it happens all the time. Let me check your account. Okay, yes, it's about two weeks overdue. There's a small fine - ten cents a day, so that's one dollar forty.

Student: Oh, that's not as bad as I feared. Can I pay it now?

Librarian: You can, but actually, let me mention something. If you're a first-time offender - and I can see this is your first overdue book - we can waive the fine this once. It's a policy we have to encourage students to keep using the library rather than avoiding it out of guilt.

Student: Really? That's very kind. Thank you.

Librarian: You're welcome. Just try to return things on time in future. One tip: you can renew a book online up to three times, as long as no one else has requested it. So if you need more time, renew it before the due date rather than letting it go overdue.

Student: I didn't know I could renew online. That's really useful. Actually, could I renew this same book? I haven't finished it.

Librarian: Let me check... yes, no one's waiting for it, so I'll renew it for you now. That gives you another three weeks.

10 Comprensión auditiva - Anuncio

Good morning, everyone. This is an announcement about the university's new bike-repair station, which opens this week near the main entrance. As part of our effort to encourage cycling, the station provides free tools that any student or staff member can use to make basic repairs to their bicycle - things like pumping up tires, adjusting brakes, or tightening a loose seat. The tools are attached to the stand with cables, so they stay available for everyone; please don't remove them. There's also a free air pump.

If you're not sure how to fix something, we've put up a simple illustrated guide, and there are short video tutorials linked by a code you can scan with your phone. For more serious repairs, the guide

lists local bike shops that offer a student discount. We hope this makes cycling to campus easier and cheaper for everyone. Remember to always lock your bike in the designated racks. Thank you.

11 Comprensión auditiva - Charla académica

Professor: Today I want to discuss a striking idea about how we make decisions. We like to think of ourselves as rational - that we carefully weigh the evidence and choose the best option. But decades of research in psychology suggest that much of our thinking relies on mental shortcuts, which psychologists call "heuristics." These shortcuts are usually helpful, letting us make quick judgments without exhausting effort. But they can also lead us into systematic errors, or "biases." Let me give you one well-known example: the availability heuristic. This is our tendency to judge how likely something is by how easily examples come to mind. If examples are easy to recall, we assume the thing is common; if they're hard to recall, we assume it's rare. Often this works fine. But it can badly mislead us. For instance, after seeing dramatic news coverage of a plane crash, many people overestimate the danger of flying, even though, statistically, flying is far safer than driving. The vivid, memorable images of the crash are "available" in memory, so the risk feels bigger than it is. Why do we have these shortcuts if they can mislead us? The answer is that for most of human history, and in most everyday situations, they serve us well. Quick, "good enough" judgments were often more valuable than slow, perfect calculations - especially when a fast decision could mean survival. The shortcuts are the product of a mind built for efficiency, not for statistical accuracy. The practical value of understanding heuristics is this: once you know about a bias, you can sometimes correct for it.

If you catch yourself judging a risk based on a scary headline, you can pause and ask, "What do the actual numbers say?" You won't eliminate these biases - they're too deeply built in - but awareness gives you a chance to override them when the stakes are high. In short, knowing how your mind takes shortcuts is the first step toward thinking more clearly.

Comprensión auditiva - Módulo 2 - Elegir una respuesta

12 Elegir una respuesta 1

Can you help me carry these boxes upstairs?

13 Elegir una respuesta 2

Where are the tickets for tonight’s performance?

14 Elegir una respuesta 3

I am worried that this paragraph is not clear.

15 Elegir una respuesta 4

Did you remember to cancel the room booking?

16 Elegir una respuesta 5

How much time should we allow for the transfer?

17 Elegir una respuesta 6

I did not expect the library to be this crowded.

18 Elegir una respuesta 7

When will the replacement part arrive?

19 Elegir una respuesta 8

The forecast says it may freeze tonight.

Comprensión auditiva - Módulo 2 - Audios extensos

20 Corrección de una tarjeta de identificación estudiantil

Student: My new identification card arrived, but my family name is spelled incorrectly. Staff

Member: I am sorry about that. I can request a replacement. First, upload a photograph of your passport to the secure form.

Student: Will my current card stop working immediately? Staff

Member: No. Keep using it until the replacement is ready next week. We will email you, and you can exchange the old card at this desk. There is no replacement fee because the error was ours.

21 Jornada matutina de voluntariado en el jardín

Announcer: Volunteers for Saturday’s community garden morning should meet at the south gate at eight thirty. The forecast is dry, so the event will proceed as planned. Gloves and tools are provided, but bring a refillable water bottle and wear closed shoes. New volunteers will receive a short safety briefing before joining a team. If you registered and can no longer attend, cancel online by Friday noon so someone on the waiting list can participate.

22 Cómo se orientan las aves migratorias

Professor: Migration is a regular seasonal journey that usually includes a return, not simply any movement from one place to another. Birds making these journeys must determine direction and position across landscapes that may be unfamiliar. Evidence suggests that many species combine several sources of information instead of relying on one perfect biological compass. During the day, some birds can use the sun’s position, adjusted for the time of day. At night, star patterns and the rotation of the sky can provide direction. Experiments also show sensitivity to Earth’s magnetic field. Visual landmarks, odors, and even low-frequency sound may contribute in certain species or locations. Young birds sometimes inherit a general direction, while experience can improve a route over repeated journeys. Using several cues makes navigation more flexible, but each cue can be disrupted. Clouds hide celestial information. Magnetic conditions vary, and artificial night lighting can disorient birds that travel after dark. Researchers test navigation by changing one cue while monitoring release direction or flight paths. A changed response supports a role for that cue, but it does not prove the bird uses nothing else. The emerging picture is a system in which cues can reinforce, calibrate, or sometimes contradict one another.

Expresión oral - Escuchar y repetir

23 Repetición 1

The meeting starts at ten.

24 Repetición 2

He washed the car and cleaned the windows.

25 Repetición 3

The nurse reminded the patient to take the medicine twice a day.

26 Repetición 4

The committee agreed that the festival should be held in the town square this year.

27 Repetición 5

Once the software update had been installed, the computers ran faster and crashed far less often.

28 Repetición 6

Please return borrowed laboratory equipment to the front desk before the building closes this evening.

29 Repetición 7

Students interested in the exchange program can meet former participants and ask questions at the information session next Tuesday.

Expresión oral - Entrevista

30 Entrevista 1

To begin, describe a journey or trip you enjoyed. Where did you go, and what made it enjoyable?

31 Entrevista 2

Some people prefer to buy new things, while others prefer to repair or reuse what they have. Which are you, and why? Give reasons and an example.

32 Entrevista 3

Your university can spend money on either more scholarships for students or better sports facilities. Which would you recommend, and why? Explain how it would benefit students.

33 Entrevista 4

Finally, make a prediction: how might the way people work and earn a living change over the next twenty years? Explain your reasoning.
