TOEFL iBT 2026 · Set 1

Comprensión auditiva - Módulo 1 - Elegir una respuesta

01 Elegir una respuesta 1

You look so happy today! Did you get some good news?

02 Elegir una respuesta 2

We're all going out for dinner on Saturday. Would you like to come?

03 Elegir una respuesta 3

Oh no, I forgot my umbrella and it's pouring outside.

04 Elegir una respuesta 4

Could you send me the information about next week's workshop?

05 Elegir una respuesta 5

You look really cheerful today. Did something good happen?

06 Elegir una respuesta 6

Could you remind me where the tutoring center is?

07 Elegir una respuesta 7

I am afraid the printer has run out of paper again.

08 Elegir una respuesta 8

Would you mind watching my bag for a minute?

Comprensión auditiva - Módulo 1 - Audios extensos

09 Comprensión auditiva - Conversación

Man: Have you decided which elective you're taking next term?

Woman: I'm stuck between two, actually. There's "Introduction to Psychology," which sounds really interesting, and "Public Speaking," which I know I need but am kind of dreading.

Man: Why are you dreading public speaking?

Woman: I get really nervous in front of people. But that's exactly why I feel like I should take it - I'll have to give presentations in almost every career, and I never get better by avoiding it.

Man: That's a mature way to look at it. Psychology would probably be more enjoyable, but public speaking might be more useful in the long run.

Woman: Right. And a friend who took the public speaking course last year said the teacher is really supportive - you start with tiny, low-pressure exercises and build up gradually. It's not like you have to give a big speech on day one.

Man: That does sound less scary. Honestly, I might take it too. I could use the practice.

Woman: You should! It'd be easier with a friend in the class. Okay, you've helped me decide - I'll sign up for public speaking. I can always take psychology another term.

10 Comprensión auditiva - Anuncio

Good morning, students. This is an announcement about the campus cafeteria. Starting next Monday, we are introducing a number of changes based on the feedback many of you gave in last term's survey. First, we're extending our opening hours: the cafeteria will now stay open until nine p.m. on weekdays, so those of you studying late can still get a hot meal. Second, we're expanding our vegetarian and vegan options - there will be at least three plant-based main dishes available at every meal.

Third, to reduce waste, we're switching to reusable plates and cups for anyone eating in; disposable containers will only be given to those taking food away. We'll have a small deposit system for takeaway containers, which you get back when you return them. We hope these changes make the cafeteria a better place for everyone. Thank you for your feedback - it really does make a difference.

11 Comprensión auditiva - Charla académica

Professor: Today I want to talk about a color that changed the world - or rather, a color that was, for most of history, almost impossible to make: the color purple. Specifically, a deep reddish-purple dye known in the ancient world as Tyrian purple. Understanding its story tells us a lot about how scarcity shapes value and even politics. In the ancient Mediterranean, this purple dye was made from the mucus of certain sea snails. And here's the astonishing part: it took thousands of snails to produce just a tiny amount of dye - by some estimates, around ten thousand snails for a single gram. The process was slow, foul-smelling, and enormously labor-intensive. As a result, purple cloth became one of the most expensive substances in the world, worth more than its weight in gold. Because it was so costly, purple became a symbol of wealth and power. Only emperors, kings, and the very rich could afford it. In the Roman Empire, laws were even passed restricting who was allowed to wear purple - at times, only the emperor himself. This is where we get the phrase "born to the purple," meaning born into royalty. The color's meaning came almost entirely from its scarcity, not from anything about the color itself. Now, here's the twist that I find fascinating. In eighteen fifty-six, a young British chemistry student named William Perkin was trying to make an anti-malaria drug, and he accidentally created the first synthetic purple dye. Suddenly, purple could be manufactured cheaply and in large quantities. Within a few decades, this once-royal color became available to ordinary people.

And This Is

The

Deeper

Lesson: the value of purple was never really about the color. It was about how hard it was to get. Once technology removed that difficulty, the color lost its exclusive meaning. Scarcity, not beauty, had been doing the work all along.

Comprensión auditiva - Módulo 2 - Elegir una respuesta

12 Elegir una respuesta 1

How long will the chemistry lab stay open tonight?

13 Elegir una respuesta 2

I thought Maya was presenting first.

14 Elegir una respuesta 3

Why do we not take the earlier train?

15 Elegir una respuesta 4

Could I exchange this shirt without the receipt?

16 Elegir una respuesta 5

The lecture was more interesting than I expected.

17 Elegir una respuesta 6

Did you not reserve a study room?

18 Elegir una respuesta 7

I am sorry I missed your call.

19 Elegir una respuesta 8

Where should I leave the completed form?

Comprensión auditiva - Módulo 2 - Audios extensos

20 Préstamo de un kit de grabación

Student: Hi, I reserved a recording kit for my media assignment, but the confirmation says pickup is tomorrow. I actually need it this afternoon. Staff

Member: Let me check. The kit assigned to you is still out, but a smaller kit was returned early. It has the same microphone and recorder, though it does not include a tripod.

Student: That is fine. I can borrow a tripod from my classmate. Staff

Member: Great. I will change the reservation. Please return everything by four tomorrow.

21 Aviso de mantenimiento de la piscina

Announcer: The campus pool will close at six this evening instead of nine because technicians must inspect the ventilation system. The morning schedule tomorrow is unchanged, and the pool will reopen at seven. Tonight's beginner swimming class has been moved to Thursday at the same time. Registered students will keep their places automatically, so they do not need to enroll again.

22 Asociaciones entre corales y algas

Professor: Reef-building corals may look like rocks or plants, but the coral polyps are animals. Many shallow-water corals live in partnership with microscopic photosynthetic algae inside their tissues. The coral gives the algae a protected place and supplies compounds used in photosynthesis. In return, the algae produce oxygen and energy-rich materials that support coral growth. Because both partners benefit, biologists call this relationship mutualism. This partnership also helps explain coral bleaching. Heat or another source of stress can disrupt the relationship and cause corals to lose much of their algae. Since the algae contribute color, the pale coral skeleton becomes visible through the animal's tissue. A bleached coral is not necessarily dead, but it has lost an important energy source. If stressful conditions end soon, algae can return and the coral may recover. If stress is intense or prolonged, starvation and disease become more likely. Not every coral depends on these algae. Deep-sea corals live without sunlight and obtain energy by capturing plankton and organic particles. So the familiar coral-algae partnership is extremely important in shallow reefs, but it is not a definition that applies to every coral species.

Expresión oral - Escuchar y repetir

23 Repetición 1

The office is closed.

24 Repetición 2

She made a cake for her brother's birthday.

25 Repetición 3

The workers repaired the road after the heavy rain.

26 Repetición 4

The professor announced that the deadline had been extended by one week.

27 Repetición 5

Because the tickets had sold out quickly, the band agreed to perform a second concert.

28 Repetición 6

Students who need extra help can book a tutoring appointment through the learning center website.

29 Repetición 7

Although the library will remain open during renovations, visitors should use the east entrance until the main doors reopen.

Expresión oral - Entrevista

30 Entrevista 1

To begin, tell me about your favorite way to spend a free day. What do you do, and why do you enjoy it?

31 Entrevista 2

Some people prefer to study in the morning, while others prefer to study at night. Which do you prefer, and why? Give reasons and an example.

32 Entrevista 3

Your university can spend money on either faster internet or more comfortable study spaces. Which would you recommend, and why? Explain how it would benefit students.

33 Entrevista 4

Finally, make a prediction: how might the way people learn new skills change over the next twenty years? Explain your reasoning.
