TOEFL iBT 2026 · Set 6

Comprensión auditiva - Módulo 1 - Elegir una respuesta

01 Elegir una respuesta 1

Excuse me, could you tell me where the manager's office is?

02 Elegir una respuesta 2

Would you like to join us for the hike this Saturday?

03 Elegir una respuesta 3

How do you usually get to campus in the morning?

04 Elegir una respuesta 4

Could you give me a hand moving these into the car?

05 Elegir una respuesta 5

Did you manage to finish your essay?

06 Elegir una respuesta 6

Has the financial aid office answered your email?

07 Elegir una respuesta 7

Could you show me how to use this scanner?

08 Elegir una respuesta 8

Why was the soccer practice cancelled?

Comprensión auditiva - Módulo 1 - Audios extensos

09 Comprensión auditiva - Conversación

Student: Excuse me, Professor Han, do you have a minute? I wanted to ask about the research essay.

Professor: Of course, come in. What's on your mind?

Student: Well, I chose to write about renewable energy, but the topic feels too broad. Every source I find covers something different - solar, wind, policy, costs. I'm not sure how to focus it.

Professor: That's a very common problem, and honestly, recognizing it is half the battle. A good research essay usually answers one specific question, not a whole field. So instead of "renewable energy," what if you asked something like, "Why has solar power become cheaper than coal in the last decade?"

Student: Oh, that's much more manageable. So I should narrow it to one question first, and then find sources that speak to that question?

Professor: Exactly. And don't be afraid to leave things out. If a source is interesting but doesn't help answer your question, it doesn't belong in the essay. That's the hardest lesson for most students.

Student: That makes sense. Should I email you my question once I've decided?

Professor: Please do. I'm happy to give you feedback before you start writing - that's the best time to catch a topic that's still too wide.

10 Comprensión auditiva - Anuncio

Attention, students. This is a reminder from the Student Activities Office. The annual Club Fair will take place this Friday from eleven a.m. to three p.m. on the main quad. More than forty student clubs will have tables where you can learn about their activities and sign up to join. This year, we've added a new feature: a "quiet room" in the student center for anyone who prefers a calmer space to talk with club representatives one on one.

If the weather is bad, the entire fair will move indoors to the gymnasium - check your email that morning for confirmation. Free refreshments will be available while supplies last. We hope to see you there, and remember: joining a club is one of the best ways to make friends and build your

résumé.

11 Comprensión auditiva - Charla académica

Professor: Let's talk about why we forget things - and I want to start by challenging an assumption. Most people think forgetting is simply a failure of memory, like a leak in a bucket. But many psychologists now argue that forgetting is actually a useful feature, not a bug. Consider what would happen if you remembered everything - every phone number you ever dialed, every route you ever walked, every conversation word for word. That sounds powerful, but it would be paralyzing. Your brain would be cluttered with outdated and irrelevant information. When you needed to recall where you parked your car today, you'd have to sift through the memory of where you parked it every previous day. Forgetting old, unused information actually helps you retrieve what's currently relevant. There's a well-known case study of a man who could not forget - he remembered essentially everything he experienced. You might expect him to be a genius, but in fact he struggled. He found it hard to think abstractly or to see the general pattern behind specific details, because every detail remained equally vivid. The forest was lost in the trees. So how does the brain decide what to keep? One key factor is use. Memories that are retrieved and used are strengthened, while those that go unused gradually weaken. This is sometimes described as "use it or lose it." Another factor is emotional significance - we tend to retain memories tied to strong emotions.

From an evolutionary standpoint, this makes sense: remembering a dangerous situation could save your life, while remembering what you had for lunch three Tuesdays ago rarely matters. The takeaway is that a healthy memory isn't one that holds on to everything. It's one that efficiently keeps what's useful and lets go of what isn't.

Comprensión auditiva - Módulo 2 - Elegir una respuesta

12 Elegir una respuesta 1

Do you know when the replacement component is due?

13 Elegir una respuesta 2

I am worried that my introduction is too long.

14 Elegir una respuesta 3

Do we need tickets for tomorrow's lecture?

15 Elegir una respuesta 4

Where did you find that internship listing?

16 Elegir una respuesta 5

The cafeteria line is much shorter today.

17 Elegir una respuesta 6

Would you prefer to meet in person or online?

18 Elegir una respuesta 7

I think I left my umbrella in your office.

19 Elegir una respuesta 8

How was the new student orientation?

Comprensión auditiva - Módulo 2 - Audios extensos

20 Revisión de un ensayo de investigación

Student: My research essay has plenty of sources, but the paragraphs still feel disconnected.

Instructor: Your evidence is relevant. The difficulty is that each paragraph summarizes a source instead of advancing one claim. Start by writing a sentence that states the relationship you see among the sources.

Student: Then I should organize the evidence around that relationship?

Instructor: Exactly. Use that sentence as a working thesis, and move each example beside the point it supports. Bring the new outline on Thursday, and we can check the sequence together.

21 Cierre de la entrada del edificio de ciencias

Announcer: The north entrance of the science building will be closed from Tuesday through Friday while workers replace the exterior steps. During that period, use the accessible east entrance beside the greenhouse. Deliveries must go to the loading area on Pine Street. All laboratories and classrooms will follow their normal schedules, and emergency exits will remain available.

22 Ríos atmosféricos

Professor: An atmospheric river is a long, relatively narrow region of the atmosphere that transports water vapor.

The Name

Is

A

Metaphor: it is not a river of liquid water in the sky. Winds move the vapor, often from warm ocean regions toward a continent. When the air rises over coastal terrain, it cools, water condenses, and substantial rain or snow can fall. Atmospheric rivers are not automatically disasters. A moderate event may replenish reservoirs and build mountain snowpack that supplies water in later seasons. Problems arise when an especially strong system arrives, when several systems occur close together, or when the rain falls on soil that is already saturated. Then flooding, landslides, and rapid runoff become more likely. Forecasters combine satellite observations, radar, weather balloons, aircraft measurements, and numerical models. Satellites help reveal the broad corridor of moisture over the ocean, while instruments closer to land provide details about winds and precipitation. Forecast uncertainty remains important because a small shift in the path can change which watershed receives the heaviest precipitation. So an atmospheric river is best understood as a transport mechanism whose effects depend on its strength, duration, path, and the conditions on the ground.

Expresión oral - Escuchar y repetir

23 Repetición 1

The store opens at eight.

24 Repetición 2

We missed the bus, so we walked to class.

25 Repetición 3

The scientists collected samples from three different rivers.

26 Repetición 4

The novel that we read for class was translated from Portuguese.

27 Repetición 5

Before the museum opened to the public, the paintings were carefully restored by experts.

28 Repetición 6

The writing center provides individual feedback on essays, reports, and other assignments throughout the semester.

29 Repetición 7

Anyone who reserved a study room must arrive within ten minutes, or the reservation may be offered to another group.

Expresión oral - Entrevista

30 Entrevista 1

To begin, tell me about a hobby or activity you enjoy in your free time. What is it, and why do you like it?

31 Entrevista 2

Some people like to plan everything in advance, while others prefer to be spontaneous. Which are you, and why? Give reasons and an example.

32 Entrevista 3

Your university has money to add either more online courses or more in-person courses. Which would you recommend, and why? Explain how it would help students.

33 Entrevista 4

Finally, make a prediction: how do you think the way people work will change in the next twenty years? Explain your reasoning.
