TOEFL iBT 2026 · Set 9

Comprensión auditiva - Módulo 1 - Elegir una respuesta

01 Elegir una respuesta 1

Excuse me, can you tell me where the library is?

02 Elegir una respuesta 2

Would you like to grab coffee with me at two o'clock?

03 Elegir una respuesta 3

Oh no, I forgot to bring a pen for the exam.

04 Elegir una respuesta 4

Do you want to meet this afternoon to go over the assignment?

05 Elegir una respuesta 5

How did your job interview go yesterday?

06 Elegir una respuesta 6

Have you decided which seminar to attend?

07 Elegir una respuesta 7

Why is the copy machine making that sound?

08 Elegir una respuesta 8

Could I return these headphones tomorrow?

Comprensión auditiva - Módulo 1 - Audios extensos

09 Comprensión auditiva - Conversación

Man: Have you started thinking about where you'll live next year? The housing application is due soon.

Woman: I have, actually. I'm torn between staying in the dorms and renting an apartment with friends off campus.

Man: What's making it hard to decide?

Woman: Well, the dorms are convenient - I can walk to class in five minutes, meals are included, and I don't have to worry about bills. But they're kind of expensive, and honestly, they can be noisy when I'm trying to study.

Man: And the apartment?

Woman: An apartment would be cheaper if I split it three ways, and it'd be quieter. But it's a twenty-minute bus ride from campus, and we'd have to cook for ourselves and deal with electricity and internet bills. Plus, if a roommate moves out, I'm stuck covering more of the rent.

Man: That's a real risk. Have you talked to the friends you'd live with?

Woman: Not seriously yet. I think that's my next step - I need to know they're actually committed before I sign anything. A cheaper apartment isn't worth it if it falls apart halfway through the year.

Man: Smart. I'd definitely nail that down first.

10 Comprensión auditiva - Anuncio

Attention, please. This is an announcement for everyone attending today's career workshop. Because of a much larger turnout than expected, we are moving the workshop from Room 210 to the main auditorium on the ground floor. The larger space will let everyone have a seat and see the presentation clearly. The start time remains the same - two p.m. - but please make your way to the auditorium now, as we'd like to begin promptly.

Representatives from twelve companies are here today, and after the presentation there will be time to speak with them individually at tables set up along the back wall. If you brought copies of your

résumé, have them ready. Thank you for your flexibility, and enjoy the workshop.

11 Comprensión auditiva - Charla académica

Professor: Today let's talk about something you use every day without thinking about it: sleep. Specifically, I want to focus on why sleep seems to be so important for memory. For a long time, sleep was seen as basically downtime - the brain switching off. We now know that's completely wrong. During sleep, the brain is doing some of its most important work. Researchers have found that sleep plays a crucial role in a process called memory consolidation. During the day, you take in an enormous amount of information, and it's stored temporarily in a region of the brain called the hippocampus. Think of the hippocampus as a kind of inbox - fast to write to, but limited in space. During deep sleep, the brain appears to transfer important memories from this temporary store into the neocortex, where they can be stored more permanently. In effect, sleep is when the day's experiences get filed away for long-term keeping. There's striking experimental support for this. In one type of study, participants learn a task - say, a sequence of finger movements or a list of word pairs - and are then tested either after a night of sleep or after an equal period of being awake during the day. Consistently, the groups that slept perform better. It's not just that they're more rested; the sleeping brain has actively strengthened the memory. Dreaming may play a role too, particularly during a stage called REM sleep.

Some researchers think the brain replays and reorganizes experiences during REM, which may help with learning and even with creative problem-solving. That's why the advice to "sleep on it" before making a decision has some real science behind it. The practical takeaway is simple but often ignored: pulling an all-nighter before an exam is one of the worst things you can do, because you're sacrificing the very process that would cement what you studied.

Comprensión auditiva - Módulo 2 - Elegir una respuesta

12 Elegir una respuesta 1

Where will the tutoring session take place?

13 Elegir una respuesta 2

I cannot believe the concert tickets sold out already.

14 Elegir una respuesta 3

Did the professor explain why the quiz was delayed?

15 Elegir una respuesta 4

Would it be possible to extend the equipment loan?

16 Elegir una respuesta 5

How did you get to the airport so early?

17 Elegir una respuesta 6

The new chairs are less comfortable than the old ones.

18 Elegir una respuesta 7

Who is responsible for updating the event calendar?

19 Elegir una respuesta 8

Should we order food before the meeting starts?

Comprensión auditiva - Módulo 2 - Audios extensos

20 Comparación de opciones de alojamiento

Student: I was offered a place in the residence hall, but I am also considering an apartment with two classmates.

Adviser: The residence contract includes utilities and is close to your morning classes. The apartment rent looks lower, but ask whether heating and internet are additional.

Student: My classmates want an answer tonight.

Adviser: Do not sign until you read the full lease and confirm how long it lasts. You can ask the housing office to review the terms tomorrow. The residence offer remains open until Friday.

21 Jornada matutina de voluntariado en el jardín

Announcer: Saturday's community garden volunteer session will begin at eight thirty, thirty minutes earlier than originally announced, because the afternoon is expected to be hot. Meet at the tool shed and wear closed shoes. Gloves and drinking water will be provided. If heavy rain forces a cancellation, registered volunteers will receive a text message by seven a.m.; otherwise, assume the session will proceed.

22 Datación por radiocarbono y contexto

Professor: Radiocarbon dating helps researchers estimate the age of material that was once alive, such as wood, seeds, bone, or charcoal. While an organism lives, carbon moves between it and the environment. After death, that exchange stops, and the radioactive isotope carbon-14 decays at a predictable rate. Measuring how much remains provides an estimate of when the organism died. The method does not directly date every object at a site. A stone tool contains no carbon from a once-living organism, so a laboratory cannot radiocarbon-date the stone itself. Researchers may instead date charcoal or another organic material found in a secure association with the tool. That association must be evaluated carefully. A root, burrowing animal, or later human activity can move material between layers and create a misleading relationship. Radiocarbon ages also require calibration because the concentration of carbon-14 in the atmosphere has varied over time. Researchers compare measurements with independently dated records, including long tree-ring sequences, to convert a laboratory result into probable calendar-age ranges. The result is therefore not usually one perfectly certain year. Radiocarbon evidence is strongest when it agrees with stratigraphy, artifacts, and other dating methods. Context and uncertainty are part of the conclusion, not flaws to hide.

Expresión oral - Escuchar y repetir

23 Repetición 1

The library is on the left.

24 Repetición 2

They planted a garden behind the house.

25 Repetición 3

The report was finished a day before the deadline.

26 Repetición 4

The manager explained that the new policy would take effect next month.

27 Repetición 5

After the researchers had analyzed the data, they published their conclusions in a leading journal.

28 Repetición 6

The bookstore will extend its opening hours during the first week of the new semester.

29 Repetición 7

Even though the outdoor concert is free, guests need to reserve a ticket because space in the garden is limited.

Expresión oral - Entrevista

30 Entrevista 1

Let's begin. Describe a book, film, or song that has stayed with you. What is it, and why did it affect you?

31 Entrevista 2

Some people prefer to travel to new places, while others prefer to return to familiar ones. Which do you prefer, and why? Give reasons and an example.

32 Entrevista 3

Your city can spend its budget on either improving public parks or building a new community center. Which would you recommend, and why? Explain how it would benefit residents.

33 Entrevista 4

Finally, make a prediction: how might communication between people change over the next twenty years? Explain your reasoning.
