Comprensión auditiva - Módulo 1 - Elegir una respuesta

01 Elegir una respuesta 1

Excuse me, do you know where I can find the schedule for the club meetings?

02 Elegir una respuesta 2

Could you send me a copy of the report before the meeting?

03 Elegir una respuesta 3

I think I lost my umbrella somewhere on campus. Where should I go to look for it?

04 Elegir una respuesta 4

Are you coming to the guest lecture this afternoon?

05 Elegir una respuesta 5

You look so relieved today. Did you finally finish your thesis?

06 Elegir una respuesta 6

Is there any chance you could cover my shift tonight?

07 Elegir una respuesta 7

I wonder whether this bus stops near the stadium.

08 Elegir una respuesta 8

Could I borrow the conference room projector?

Comprensión auditiva - Módulo 1 - Audios extensos

09 Comprensión auditiva - Conversación

Man: Are you going to run for the student council election? The deadline to apply is Friday.

Woman: I've been thinking about it, actually. But I'm not sure I have time. Between classes and my part-time job, I'm already stretched thin.

Man: I get that. But you're always complaining about how the council never does anything about the issues students care about - like the lack of study space during exams.

Woman: That's true. And honestly, that's exactly why I'm tempted. If I don't run, I can't really complain, can I?

Man: Fair point. How much of a time commitment is it, do you know?

Woman: From what I've heard, it's about three hours a week - one meeting plus some smaller tasks. It's not huge, but it adds up during busy weeks.

Man: Three hours isn't bad. And it would look great on your résumé. Plus, you'd actually be able to push for those changes you keep talking about.

Woman: You know what, you're right. I'd rather try and maybe make a difference than sit around wishing things were better. I'll put my name in before Friday.

10 Comprensión auditiva - Anuncio

Attention, all passengers. This is an announcement regarding the airport shuttle service. Due to unexpected road maintenance on the main access road, the shuttle to Terminal 2 will depart from a temporary stop at Bay 7, rather than the usual Bay 3, until further notice. Bay 7 is located at the far end of the arrivals hall, near the information desk. The shuttle will continue to run every fifteen minutes, and the journey time to Terminal 2 remains about ten minutes.

If you are catching a flight, we recommend allowing a little extra time to find the new departure point. Staff in orange vests are stationed throughout the arrivals hall to direct you. We apologize for any confusion this may cause and thank you for your patience.

11 Comprensión auditiva - Charla académica

Professor: Today I want to explore a question that connects biology, history, and even economics: why did humans start farming? For most of our history - hundreds of thousands of years - humans were hunter-gatherers, moving around and living off wild plants and animals. Then, around twelve thousand years ago, in several parts of the world independently, people began to farm. This shift, sometimes called the Agricultural Revolution, changed everything. But why did it happen? Here's a puzzle that has fascinated researchers: in many ways, early farming actually made people's lives harder, at least at first. Studies of ancient skeletons suggest that early farmers were often shorter, showed more signs of disease, and worked longer hours than the hunter-gatherers who came before them. Their diets were less varied, relying heavily on a few crops. So if farming was such hard work and produced less healthy people, why did anyone do it? The leading explanation is not that farming made individual lives better, but that it allowed populations to grow. A given piece of land, once farmed, could support far more people than the same land could as wild territory. More food, even if it was less nutritious, meant more children surviving. So farming communities grew in number and eventually outcompeted or absorbed the hunter-gatherers around them. It's a crucial distinction: farming succeeded not because it improved quality of life, but because it improved quantity - of food and of people. This has a broader lesson for how we think about human history.

We often assume that new technologies are adopted because they make life better. But sometimes a technology spreads simply because it out-reproduces the alternative, even if the people using it are worse off. Farming didn't win because it was pleasant. It won because it was, in a demographic sense, unstoppable.

Comprensión auditiva - Módulo 2 - Elegir una respuesta

12 Elegir una respuesta 1

How did you hear about the volunteer position?

13 Elegir una respuesta 2

The office plants look much healthier now.

14 Elegir una respuesta 3

Where can I store my suitcase during the tour?

15 Elegir una respuesta 4

Did the restaurant change our reservation time?

16 Elegir una respuesta 5

Would you mind explaining the last equation again?

17 Elegir una respuesta 6

Why has the walking path been closed?

18 Elegir una respuesta 7

I cannot attend the training session on Monday.

19 Elegir una respuesta 8

Who should approve the final design?

Comprensión auditiva - Módulo 2 - Audios extensos

20 Reposición de un libro dañado de la biblioteca

Student: A library book in my backpack was damaged when my water bottle leaked. I want to replace it.

Librarian: Thank you for reporting it. Please do not buy a copy yet, because the library needs the same edition and binding.

Student: How will I know what to order?

Librarian: I will check whether our supplier can replace it. If so, you will pay the supplier's price through your library account. If that edition is unavailable, the collections librarian will choose an equivalent rather than asking you to find one.

21 Plan meteorológico para una película al aire libre

Announcer: Tonight's outdoor film is still scheduled for eight p.m. on the central lawn. Staff will make a final weather decision at six. If rain is expected, the screening will move to the student center ballroom, where seating is limited to the first two hundred guests. Check the event page before leaving home. Food may be brought to the lawn but not into the ballroom.

22 Ceniza volcánica y aviación

Professor: Volcanic ash is not the soft residue produced by a wood fire. It consists of tiny fragments of rock, minerals, and volcanic glass created during an eruption. Winds can carry these abrasive particles hundreds of kilometers from the volcano and place them at the same altitudes used by aircraft. An ash cloud presents several hazards. Particles can reduce visibility, scratch windshields, contaminate instruments, and enter jet engines. Inside a hot engine, some ash can melt and then stick to cooler components, disrupting airflow. Engines may lose power or shut down. Even a lower-concentration encounter can accelerate wear, so the absence of an immediate failure does not mean there was no damage. Avoidance is the central protection because pilots may not reliably distinguish ash from an ordinary cloud and onboard weather radar is not designed simply to identify every ash plume. Volcano observatories report eruptions; satellites, ground observations, and atmospheric models help track and forecast plume movement; specialized advisory centers distribute warnings. Uncertainty about particle concentration and height remains, so routes or airports may be changed as a precaution. The response depends on coordinated evidence, not on a pilot waiting to see ash through the window.

Expresión oral - Escuchar y repetir

23 Repetición 1

The lesson ends at noon.

24 Repetición 2

He fixed the bicycle and rode it to school.

25 Repetición 3

The tour guide showed the visitors the oldest part of the city.

26 Repetición 4

The report suggested that the company should invest more in staff training.

27 Repetición 5

When the power went out during the storm, the students continued their experiment by candlelight.

28 Repetición 6

The art department will display student projects in the lobby until the end of the month.

29 Repetición 7

When the weather improves, the geology class will visit the nearby cliffs to collect samples and practice field observations.

Expresión oral - Entrevista

30 Entrevista 1

To begin, describe a place where you like to relax. Where is it, and why do you find it relaxing?

31 Entrevista 2

Some people prefer to learn from books, while others prefer to learn from videos. Which do you prefer, and why? Give reasons and an example.

32 Entrevista 3

Your city can spend money on either cleaning up a river or planting trees along the streets. Which would you recommend, and why? Explain how it would benefit residents.

33 Entrevista 4

Finally, make a prediction: how might people's free-time activities change over the next twenty years? Explain your reasoning.
