Comprensión auditiva - Módulo 1 - Elegir una respuesta

01 Elegir una respuesta 1

Excuse me, do you know where the restrooms are?

02 Elegir una respuesta 2

Would you mind checking my essay before I hand it in?

03 Elegir una respuesta 3

I'm really stuck on this assignment. How can I get some help with it?

04 Elegir una respuesta 4

I'm sorry, but I can't make our meeting on Tuesday. Could we move it to another day?

05 Elegir una respuesta 5

You look thrilled today. Did something good happen?

06 Elegir una respuesta 6

Why is the seminar room unavailable this morning?

07 Elegir una respuesta 7

Could you remind me which chapter we are discussing?

08 Elegir una respuesta 8

The delivery arrived earlier than the tracking page predicted.

Comprensión auditiva - Módulo 1 - Audios extensos

09 Comprensión auditiva - Conversación

Student: Hi, I'm interested in doing a semester abroad next year, but I don't really know where to start.

Staff: You've come to the right place - this is the study-abroad office. Do you have a particular country or region in mind?

Student: Not exactly. I'm studying engineering, so I want somewhere with strong engineering programs, but I'd also love to improve my Spanish.

Staff: That's a helpful combination to know. We have partner universities in Spain, Mexico, and Chile that offer engineering courses, some taught in English and some in Spanish. If improving your Spanish is a goal, immersion in a Spanish-speaking country would be ideal.

Student: That sounds perfect. But I'm worried about the cost. Study abroad seems expensive.

Staff: It can be, but it's often less than people expect. You continue to pay your regular tuition here, not the host university's fees. And there are scholarships specifically for study abroad - I'd strongly encourage you to apply. The main extra costs are usually flights and living expenses, which vary a lot by country.

Student: Okay, that's reassuring. What's my next step?

Staff: I'd suggest attending our information session next Tuesday, where past participants share their experiences. After that, book a one-on-one meeting with an advisor to plan which courses would transfer back to your degree. That's the key thing to sort out early.

10 Comprensión auditiva - Anuncio

Attention, shoppers. The store will be closing in thirty minutes, at nine p.m. Please bring your final selections to the checkout counters, which will remain open until closing time. We would also like to remind you about our loyalty program. Members earn one point for every dollar spent, and points can be exchanged for discounts on future purchases. Signing up is free and takes only a minute at customer service near the main entrance. This weekend only, new members will receive a bonus of five hundred points - enough for a five-dollar discount on your next visit. Thank you for shopping with us this evening. We hope to see you again soon, and we wish you a pleasant evening.

11 Comprensión auditiva - Charla académica

Professor: Today's topic is one of the most successful stories in conservation: the recovery of a species that was once nearly extinct. I'm talking about the American bison. In the early nineteenth century, tens of millions of bison roamed North America. By the end of that century, fewer than a thousand remained. Understanding both how this collapse happened and how the species recovered teaches us a lot about conservation. The collapse was astonishingly rapid, and it was almost entirely caused by humans. As settlers expanded westward, bison were hunted on an industrial scale - for their hides, for sport, and, in some cases, as a deliberate strategy to undermine Indigenous peoples who depended on them. Within a few decades, an animal that had numbered in the tens of millions was pushed to the brink of extinction. It's a stark example of how quickly human activity can devastate even a hugely abundant species. The recovery is equally instructive. A small number of individuals - ranchers, conservationists, and some Indigenous communities - took action, protecting the last remaining animals and breeding them in protected areas. National parks such as Yellowstone became crucial refuges. Slowly, over more than a century, bison numbers climbed back into the hundreds of thousands, though most now live on ranches rather than roaming free. But here's an important nuance the story teaches us. Saving a species from extinction in terms of raw numbers is not the same as restoring its ecological role.

Bison once shaped entire grassland ecosystems - their grazing, their movement, even the way they wallowed in the dirt created habitats for other species. A few hundred thousand bison confined to ranches don't perform that ecological function the way tens of millions of free-roaming animals once did. So conservation success has layers: preventing extinction is the first, most urgent goal, but true restoration means bringing back not just the animal, but the role it played in its ecosystem.

Comprensión auditiva - Módulo 2 - Elegir una respuesta

12 Elegir una respuesta 1

Where should I return the visitor badge?

13 Elegir una respuesta 2

I am concerned that the plants will dry out over the break.

14 Elegir una respuesta 3

Did you ask for permission to record the interview?

15 Elegir una respuesta 4

When can I collect the repaired bicycle?

16 Elegir una respuesta 5

This room is colder than it was yesterday.

17 Elegir una respuesta 6

Would you send me the notes from the committee meeting?

18 Elegir una respuesta 7

How did the students respond to the new assignment?

19 Elegir una respuesta 8

I am sorry, but the vegetarian sandwiches are gone.

Comprensión auditiva - Módulo 2 - Audios extensos

20 Reprogramación de una orientación de laboratorio

Student: I registered for tomorrow's laboratory orientation, but my train was cancelled and I will not reach campus in time.

Technician: There is another session Friday morning. I can move your registration if space remains.

Student: My first experiment is Thursday afternoon. Could I attend that class before orientation?

Technician: No. The safety orientation is required before entering the laboratory. Contact your instructor today; the experiment can be completed during Friday's make-up period after your orientation.

21 Restricción de estacionamiento durante el fin de semana

Announcer: The west parking lot will close at ten p.m. Friday for resurfacing and will remain closed through Sunday evening. Vehicles left there after ten will be moved to the north lot. Weekend permit holders may use the north or stadium lots at no additional charge. The accessible spaces beside the administration building will remain open. Normal parking resumes Monday at six a.m.

22 Circulación estacional de los lagos

Professor: In many temperate lakes, summer sunlight warms the surface water. Warm water is less dense than the colder water below, so the lake separates into layers that resist mixing. This condition is thermal stratification. Wind may mix the upper layer, but the density difference limits exchange with deeper water. Organisms continue using oxygen in the deep layer while little new oxygen arrives from the atmosphere. Oxygen can therefore decline near the bottom, especially where decomposition consumes it rapidly. The amount of decline varies with lake depth, productivity, water clarity, weather, and other local conditions; stratification does not make every lake bottom oxygen-free. In autumn, the surface cools. As the density difference becomes smaller, wind can mix water through much more of the lake. This fall turnover redistributes oxygen and nutrients. A similar mixing period can occur in spring after ice melts and surface water changes temperature. Turnover is not the lake physically flipping upside down, nor is it caused by one calendar date. It describes mixing made possible when temperature and density differences weaken. Monitoring temperature and dissolved oxygen at several depths helps scientists see when layers form, how long they persist, and how conditions differ among lakes.

Expresión oral - Escuchar y repetir

23 Repetición 1

The door is open.

24 Repetición 2

She caught the early train to the city.

25 Repetición 3

The chef prepared a special meal for the guests.

26 Repetición 4

The survey found that most residents supported the new recycling program.

27 Repetición 5

After the volunteers had planted the trees, they watered them and marked each one with a small sign.

28 Repetición 6

Please place recyclable paper in the blue containers located beside the printers on every floor.

29 Repetición 7

Because several roads will close for the parade, commuters should allow extra travel time and follow the temporary signs downtown.

Expresión oral - Entrevista

30 Entrevista 1

To begin, describe a meal you really enjoy. What is it, and why do you like it?

31 Entrevista 2

Some people prefer to exercise outdoors, while others prefer to exercise in a gym. Which do you prefer, and why? Give reasons and an example.

32 Entrevista 3

Your school can spend money on either new laboratory equipment or more library books. Which would you recommend, and why? Explain how it would benefit students.

33 Entrevista 4

Finally, make a prediction: how might people's use of cars change over the next twenty years? Explain your reasoning.
